UGANDA BUREAU OF STATISTICS

2013

STATISTICAL ABSTRACT

FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meet the international standards quality requirements.

This Statistical Abstract is UBOS's prime annual publication through which key statistical information derived from the latest surveys, censuses and administrative records of Ministries, Departments and Agencies (MDAs) is disseminated.

The information presented in the 2013 Statistical Abstract covers statistics on the Environment, Demographic, Socio-economic, Production and Macroeconomic sectors. Some of the information on these sectors is presented basing on a Calendar Year (Jan-Dec) or Financial Year (July-June), depending on availability of data.

The Bureau would like to appreciate the continued cooperation of MDAs in availing the requisite data to produce this publication. In a special way, I wish to thank the 2013 Statistical Abstract committee that compiled this publication. The Bureau welcomes constructive comments from stakeholders that aim at enhancing the quality of its future publications.

Copies of this publication are available at the Bureau's head office, Statistics House, Plot 9, Colville Street, Kampala. They can also be obtained from the official UBOS website: www.ubos.org.

It is my sincere hope that the statistical information in this publication will be used by the readers to make informed decisions.

Ben Paul Mungyereza
Executive Director

EXECUTIVE SUMMARY

The Statistical Abstract is an annual publication compiled by Uganda Bureau of Statistics, which provides the statistical summary on various socio-economic indicators for Uganda. Some figures in this edition may vary from those in the earlier editions due to the updates. Note that most of the 2012 and 2012/13 data presented in this edition are provisional and could be revised in subsequent publications.

The Bureau collects data using several programmes including; population censuses, Uganda National Households Surveys, Business surveys, Panel surveys and the Community Information System (CIS), among others. The Bureau uses the Community Information System (CIS) to generate lower Local Government Statistics. The CIS is a government programme that was established to ensure that households and communities have access to and make use of reliable and meaningful data and information generated at household, parish and sub county level. The CIS generates basic information from households and communities to monitor households' welfare as well as promote efficient utilisation of information at grassroots level. The CIS household register solicits information from the respondents on a number of variables, among which are disposal of solid waste, vulnerable children, children out of school, persons with disability and agriculture. The information presented in this report is district specific and it is based on CIS data compiled from 2009 to 2011 for 47 districts.

This publication is divided into four major chapters which are preceded by a glossary of definitions and general information on Uganda. A set of Statistical Appendix Tables that are serialised, using a combination of numbers and alphabets, such as Table 1.1A, Table 2.3 B etc, are also provided for the readers' information. The reader is encouraged to refer to such tables while reading the text. It should be noted that the number of districts has been increasing. However, some information in this issue is presented basing on the 80 districts as of July- 2007, where this is the case, it is always reflected. Other information is presented basing on the 112 districts as of July 2012.

Chapter one presents environmental statistics covering land, climate, forestry and water supply with the following highlights:

Land

- Uganda has a total area of 241,550.7 square kilometres (sq. kms).
- Water bodies cover 36,902.9 sq. kms. (15.3 percent of Uganda's total area).
- Swamps cover 4,840.6 sq. kms. (2.0 percent of Uganda's total area).
- Land area is 199,807.4 sq. kms. (82.7 percent of Uganda's total area).
- Cultivated land cover increased from 84,010 sq. kms in 1990 to 99,018.4 sq. km in 2005.

Forests

- Woodlands cover declined by about 26 percent between 1990 and 2005
- Total forest cover declined by 27 percent between 1990 and 2005.
- The annual percentage change of forest cover is negative 1.8 percent.
- The value of Charcoal and Firewood consumption increased from 32.8 billion in FY 2005/06 to 409.1 billion in 2009/10.
- Round wood production increased by 1,728,000 tonnes (4.2 percent) in 2012.

Climate

- The average monthly rainfall for all the centres was above 100 millimeters except for Mbarara (98.3mm) and Kasese (70.6mm).

- The long term minimum temperature (2008-2012) for selected centres showed that Jinja and Kasese had the lowest minimum temperature in the last five years while Kampala had the highest mean minimum temperature.
- Entebbe and Jinja had generally high mean relative humidity at 6:00 hrs throughout 2012 ranging between 64 and 87 percent.

Water Supply

- Total water produced by NWSC increased from 63.6 million cubic meters in FY 2007/08 to 81.6 million cubic meters in FY 2011/12
- Kampala and Bushenyi registered the highest increments in water production of 8.6 percent and 6.4 percent respectively

Chapter Two presents Demographic and Socio-economic statistics relating to Population, Education, Labour Force, Employment and Earning, Income and Expenditure, Public Health and Crime. Below are highlights of the chapter.

Demographic and socio economic statistics

- According to the 2002 UPHC;
 - 2002 population was 24.2 million persons.
 - Annual Population growth rate between 1991 and 2002 censuses was 3.2 percent.
 - 2002 population density was 123 persons per square kilometer.
 - 49 percent of the population was below 15 years in 2002.
 - 2013 population projection is 35.4 million persons.
- According to the 2011 UDHS;
 - Total fertility rate was 6.2 children per woman.
 - Infant mortality rate was 54 deaths per 1000 live birth.
 - Under five mortality rate was 90 deaths per 1000 live birth.

Labour force, Employment and Earnings

- Overall, 4.44 million youth were in the labourforce, of which 2.17 million were male and 2.27 million were female.
- 57 percent of the working youth (between 18 and 30 years) in 2011/12 were self employed and 24 percent were wage employees.
- 5.2 percent of the youth in the labour force were unemployed.
- Agriculture sector engaged 63 percent of the working youth, followed by the services sector (29 percent) and the production sector (8 percent).
- The share of the jobs advertised in the Public Administration sub-sector increased from 49 percent in 2011 to 54 percent in 2012.

Household Expenditure and Poverty

- A 75 percent nominal increase in per capita expenditure (from US\$ 41,300 to 72,300) was recorded in 2009/10. However, real increase in per capita consumption expenditure rose by 10 percent.
- The share of household expenditure on food, beverage and tobacco increased from 44 to 50 percent between 2009/10 and 2010/11.
- Nearly 7.5 million Ugandans which is equivalent to 1.2 million households were considered poor in 2009/10.
- The proportion of the poor population reduced from 31 percent in 2005/06 to 25 percent in 2009/10.
- Nationally, on average, income inequality increased from 0.408 in 2005/06 to 0.426 in 2009/10.

- 10 percent of the population has persistently remained poor since 2006.

Health

- Malaria remains the highest cause of both morbidity and mortality among the children below 5 years of age.
- The number of active adults on Anti-Retroviral Therapy stands at 330,000 while that for children stands at 25,400.

Crime

- The prison population increased by 10.7 percent in 2012 and 53.6 percent of them were on remand.
- In 2012, there were 3 prisoners in a space meant for one prisoner in Uganda.
- Over all, serious crimes have had a gradual reduction from 21,187 in 2008 to 15,572 in 2012
- Defilement was the most common serious crime of all the serious crimes in 2012.
- There was a general reduction in road accidents with minor road accidents reducing by 11 percent, fatal road accidents by 8 percent and serious accidents by 11 percent in 2012 compared to 2011.
- Majority of road accident crashes occurred between 6.00 pm and 9.00 pm, while the lowest occurrences were between 3.00 am to 6.00am.
- Careless driving was the leading cause of road accidents (41 percent).

Chapter Three presents statistics on production, which for purposes of this Abstract include Agriculture and Fisheries, Industry, Producer Prices, Energy, Building and Construction, Transport and Communications, Tourism and Migration. Below are the highlights of the Chapter:

Index of Industrial Production

- Industrial production increased by 4.5 percent in 2012 as compared to 2.6 percent in 2011.
- Food Processing and Drinks and Tobacco production increased by 9.7 and 6.4 percent in 2012 respectively compared to the decline of 6.5 percent for Food Processing and growth by 17.9 percent for Drinks and Tabacco in 2011.
- Metal production decreased by 7.3 percent in 2012 compared to the 8.6 percent increase in 2011.

Energy

- Sales for all Petroleum Products increased by 9 percent in 2012.
- Total Energy Purchased in 2012 increased by 1.8 percent as result of the commissioning of the Bujagali hydro power Plant.

Agriculture

- Total area planted of food crops increased to 5,729,000 Ha (2 percent) in 2012.
- Tea production increased by 44.7 percent in 2012.
- Tobacco production increased by 9.3 percent in 2012 doubling the increment in 2011.
- In 2012, maize production increased by about 7.2 percent.
- The quantity of coffee procured in 2012 declined by 2.7 percent.
- Fish catch from Lake Victoria increased from 169.8 Mt in 2011 to 185.5 Mt in 2012.
- 93 percent of livestock breeds in Uganda are indigenous.

Building and Construction

- The Number of Plans submitted for Administrative Approval in 2012 increased by 35 percent, while those Approved increased by 2.1 percent.

- The Net Domestic Supply of Cement registered an increase of 2.2 percent in 2012 as compared to 11.8 percent in 2011.

Transport

- Total length of roads Paved increased by 2 percent kilometers from 3,264 in 2011 to 3,317 in 2012.
- Total Length of roads Unpaved decreased by 0.3 percent kilometers from 17,736 in 2011 to 17,683 in 2012.
- Motor Vehicle registration reduced by 23 percent from 125,518 in 2011 to 96,598 in 2012.
- Total number of passengers through Entebbe International Airport increased by 15 percent from 1,166,996 in 2011 to 1,342,112 in 2012. This was a result of an increase in tourist arrivals.
- There was a 15 percent increase in Cargo Volumes, from 49,248 tonnes in 2011 to 56,518 tonnes in 2012.

Communications

- In 2012, national telephone penetration declined to 48.8 lines per 100 population from 52.1 in 2011, representing a total of 490,498 subscribers lost.
- The volume of talk time traffic increased by 7.4 percent from 13,028 million minutes in 2011 to 13,997 million minutes in 2012.
- The average on-net domestic call rate increased to an average of 216 shillings per minute in 2012 from 192 shillings per minute at the end of 2011.
- The number of Internet Subscribers more than doubled in 2012. Subscribers with mobile accounts registered were estimated to be 2,692,705 and there were 96,000 fixed accounts subscriptions at the end of 2012.
- The number of mobile money transfer subscribers increased to 5.7 million in 2012 from 2.8 million in 2011.
- The volume of letters handled by Posta Uganda decreased by 29.8 percent in 2012.

Migration and Tourism

- The country recorded a total of 1.6 million arrivals and 1.5 million departures giving a net movement (arrival less departures) of 162,000 in 2012.
- Resident arrivals increased by 15 percent in 2012
- In 2012 the number of tourists that came into the country for leisure, recreation and holidays increased to 227,000 from 76,000 in 2011.
- Majority of tourists mainly came into the country to visit friends and relatives followed by leisure/ recreation /holiday and finally business and professionals.
- The most popularly visited national park in 2012 was Murchison Falls (33 percent), followed by Queen Elizabeth (32 percent) and Lake Mburo (13 percent).
- The number of arrivals from the EAC regions increased from 713,000 in 2011 to 770,000 in 2012.

Chapter Four presents Macro-economic statistics including National Accounts, Prices, External Trade, Public Finance, Banking, Currency and Insurance. Below are the highlights of the Chapter:

National Accounts

- In FY 2012/13, GDP at constant (2002) market prices grew by 5.1 percent. The three broad sectors below registered growth as indicated;
 - Agriculture, Forestry and Fishing (1.4 percent)
 - Industry (6.8 percent)

- Services (4.8 percent)
- The per capita income at 2002 constant price grew from Ug. Shs 665,463 in 2011/12 to Ug. Shs 675,101 in 2012/13, a growth of 1.4 percent

Consumer Price Indices

- Annual average Headline inflation registered a lower average inflation rate of 14.0 percent in 2012 compared to the 18.7 percent average inflation rate recorded in 2011.
- Annual average Core inflation rate decreased to 14.7 percent in 2012 from 17.3 percent recorded in 2011.
- Annual average Food Crops inflation rate during 2012 declined to 9.7 percent from 29.1 percent recorded in 2011.
- During 2012, increases in prices of imported fuel and electricity tariffs led to an increase in the EFU Index by 15.5 percent compared to a rise of 10.3 percent recorded for the 2011.
- Financial Year 2011/12 registered a double digit average Headline inflation rate of 23.5 percent compared to the single digit inflation rate of 6.5 percent recorded for the 2010/11 Financial Year.
- Financial Year 2011/12 also registered a double digit average Core inflation rate of 24.6 percent compared to 6.3 percent recorded for the 2010/11 Financial Year.

Producer Price Indices

- The Producer Price Index-Manufacturing (Combined) recorded an increase of 5.3 percent in 2012 compared to 30.3 percent in 2011.
- The Producer Price Index-Hotels and restaurants registered an increase of 6.2 percent as compared to 15.7 percent in 2011.

Construction Sector Indices

- Average prices of inputs in the overall construction sector increased by 7.3 percent in 2012 as compared to 25.8 in 2011.
- Inputs for Water projects registered the highest price increase of 10.1 percent in 2012.

External Trade

- The total value of Imports increased by 7.2 percent in 2012 following a previous increase of 20.2 percent in 2011.
- Trade balance continued to worsen further by 3.6 percent in 2012.
- Overall value of Exports increased by 11.8 percent in 2012 compared to 17.1 percent recorded in 2011.
- Contribution of Traditional Exports (TEs) to the overall value of exports declined from 31.4 percent in 2011 to 25.1 percent in 2012.
- The Asian continent remained the leading source of Uganda's imports in 2012 while the leading export destination in the same year was Sudan.

Government Finance Statistics

- In nominal terms, central government revenue increased by 6.5 percent from Shs. 7,292.5 billion in FY 2010/11 to Shs. 7,763.4 billion in FY 2011/12.
- Taxes on goods and services (VAT and Excise duty) remained the main source of central government revenue with their share to total revenue being 43.3 percent in FY 2011/12.
- General Public Administration, Defence and Public Order and Safety Affairs contributed the largest share of the central government recurrent expenditure in 2011/12.

Banking and Currency

- Net Foreign Assets increased by 17.6 percent between June 2011 and June 2012
- Net Domestic Credit registered a decrease of 7.1 percent between June 2011 and June 2012.
- Money supply (M3) increased by 7.4 percent between June 2011 and June 2012, whereas Money Supply (M2) decreased by 4.3 percent during the same period.
- Central Bank average lending rates to Commercial Banks increased from 16.7 percent (July 2010 – June 2011) to 25 percent between July 2011 and June 2012.
- Commercial Banks' deposit rate went up from 2.6 percent in June 2011 to 3.4 percent in June 2012.
- Total Commercial Bank assets increased by 23.3 percent between June 2011 and June 2012.

Insurance

- Number of life insurance policies issued in 2011 increased by 44.8 percent compared to a decline of 41.0 percent in 2010.
- Life insurance gross premium incomings increased by 46.3 percent between 2010 and 2011.
- Life and Non-life net premium income rose by 50.5 percent and 20.4 percent respectively between 2010 and 2011.
- Insurance companies' paid and outstanding claims (non-life) increased by 8.5 percent in 2011 compared to a 41.3 percent increase in 2010.
- Life insurance paid and outstanding claims registered an increase of 31.4 percent in 2011 compared to an increase of 145.0 percent during the year 2010.

GLOSSARY

Agriculture	This term is used to describe crops, livestock, poultry and fishing activities.
Assets	Assets are the property of a business. They may be classified as Current assets consisting of cash, stock and book debts; Fixed assets consisting of buildings, plant and machinery; and Intangible assets being the value of goodwill or patents.
Aviation fuel	This is more purified kerosene fuel used in aviation gas-turbine engines.
Base period	The reference period, to which a series of index numbers relate, This is usually expressed as 100.
BCG (Bacillus Camete Guerin)	This is a vaccine against Tuberculosis.
Bio-mass energy	This is energy that is obtained from fuel wood, charcoal and crop residues.
Broad money - (M2) A	This is equivalent to (M2) plus certificates of deposit.
Broad money - (M3)	This is equivalent to (M2) A plus foreign currency deposits.
Broad money – (M2)	This consists of the currency in circulation, as well as the demand, time and savings deposits. The deposits are held by the private sector and exclude those held by the central government.
Cohabiting	A state where a man and woman are not related but are living together in a sexual union.
Crime	Is an unlawful act or omission punishable by law
Diesel fuel	This is fuel used for internal combustion in diesel engines and as a burner fuel in heating installations such as furnaces. Another name for this product is automotive gasoil.
Divorced	A condition where legally married couples legally separate for life and each stays away from the other thereafter. However either of the two (man or woman) can re-marry.
DMBs	It stands for Deposit Money Banks. It refers to commercial banks in our institutional settings.
DPT	This is a vaccine against three diseases. These are Diphtheria, Pertusis (whooping cough) and Tetanus.
Economic activity	Covers all market production and certain types of non-market production, including production and processing of primary products for own consumption, own-account construction (owner occupied dwellings) and other production of fixed assets for own use.
Employed Persons	Persons in paid employment who work for wage or salary in cash or in kind or both and have a formal job attachment.
Employment	This includes all wage and salary earners and managers in all businesses, and directors actively working in incorporated businesses. It includes those working full-time or part-time and those who are permanent or temporary.
Employment status	Refers to the status of an economically active person with respect to his/her position at his/her place of work and his/her mode of remuneration.
Enterprise	This is a single legal entity or a combination of legal entities. It may also be a sole legal unit carrying out one or more activities at one or more locations. It may alternatively be several establishments.
Establishment	This is an economic unit engaged in one or predominantly one kind of economic activity under single ownership or control and is situated at a single physical location.
Exports	Outward flows comprising goods leaving the economic territory of a country to the rest of the world.
Foreign reserves	They consist of those external assets available to and controlled by central banks for direct financing of balance of payments imbalances, for indirectly regulating the

	magnitude of such imbalances through intervention in exchange markets to affect the currency exchange rate, and/or for other purposes. Included are monetary gold, Special Drawing Rights (SDRs), reserve position in the fund, foreign exchange assets (consisting of currency, deposits and securities) and other claims.
General Hospitals	These provide preventive, outpatient curative, maternity, inpatient health services, emergency surgery, blood transfusion, laboratory and other general services. They also provide in-service training, consultation and research in support of community-based health care programmes.
Gross Domestic Product	The value of goods and services produced within the economic territory of the country.
Gross Enrolment Rate	The ratio of pupils in primary school (regardless of age) to the country total population aged 6-12 years.
Gross Intake Rate	The ratio of the pupils enrolled in primary one regardless of age to the country total population aged six years.
Gross Output	The production value as compiled from total receipts from industrial and non industrial goods and services in an economy, adjusted for stock changes but excluding Excise Duty and Indirect Taxes. This is Gross Output at factor cost.
Headcount Poverty Index (P0)	This is the percentage of individuals estimated to be living in households with real private consumption per adult equivalent below poverty line. The indicator shows how broad poverty is, but not how deep it is.
Health Centre II	Out-patient clinics treating common diseases and offering antenatal care. It is supposed to be led by an enrolled nurse, working with a midwife, two nursing assistants and a health assistant. According to the Ugandan government's health policy, every parish is supposed to have a Health Centre II.
Health Centre III	Health centres with facilities which include an operation room and a section for minor surgery headed by a clinical officer. Every county should have this facility offers the CONTINUOUS basic preventive and curative care and provides support supervision of the community and the Health Centre II facilities under its jurisdiction.
Health Centre IV	The Health Centre IV is a mini-hospital that provides the kind of services found at Health Centre III, but it should have separate wards for men, women, and children and should be able to admit patients. It should have a senior medical officer and another doctor as well as a theatre for carrying out emergency operations. It serves a county or a parliamentary constituency.
Heavy Fuel Oil	This is residual fuel obtained after refinery of petroleum products. It is used in ships and industrial large-scale heating installations as a fuel in furnaces or boilers.
Imports	Inward flows of goods from the rest of the world into the economic territory of a country.
Index Number	A number that shows relative change in price or volume between the base period and another period.
Industry	This is an economic activity undertaken by a business establishment as specified in the ISIC.
Inflation	This is the persistent increase in the general level of prices of goods and services in an economy over a period of time
Intermediate Consumption	This is the value of goods and services that are used in the process of production of other goods and services rather than final consumption
Kerosene	This is fuel used as an illuminant for lighting and in some cases for cooking.
Labour force	Currently active population aged 14 to 64 years who were "employed" or "unemployed" during the last 7 days.
Labour force participation rate	Ratio of all economically active persons aged 14-64 years to the total number of persons aged 14-64 years.
Large Business	Business establishment employing 100 or more persons.
Liquid Petroleum Gas	Liquid Petroleum Gases (LPG's) are hydrocarbons, which are gaseous under conditions of normal temperature and pressure but are liquefied by compression or cooling to facilitate storage, handling and transportation.
Loan	A loan may be money or securities supplied by one party (the lender) to a second

	party (the borrower) in a transaction in return for a promised future payment by the borrower. Such transactions normally include the payment of interest due to the lender as per agreed repayment schedules between the two parties.
National Referral Hospitals	In addition to the services offered at the regional referral hospital, they provide comprehensive specialist services and are involved in teaching and health research.
Net Enrolment Rate	The ratio of pupils in primary school aged 6 – 12 to the country total population aged 6 -12 years.
Net Intake Rate	The ratio of the pupils aged six in primary one to the country total population aged 6 years.
Non-traditional exports	Refers to commodities other than traditional exports that have recently featured in Uganda's export trade.
Occupation	Refers to the nature of task and duties performed during the reference period preceding the interview by persons in paid employment, unpaid family work or self-employment jobs.
Orphan	A child whose biological parent or both parents are dead. Single orphans are children who have lost one biological parent, while double orphans are those who have lost both biological parents.
Overdraft	A type of a short-term loan particularly used to supply short-term working capital to tide over the production cycle or finance for seasonal requirements.
Passengers	Travellers in a car, bus, train, plane or ship who are not driving or part of the crew. These also include those embarked and disembarked.
Petrol	This is a light hydrocarbon fuel used in positive ignition engines. Another name used for this type of fuel is premium motor spirit.
Population pyramid	A population pyramid is a pictorial representation of the age distribution of a given population. Its shape is determined by the past birth and death rates in that population.
Poverty Gap (P1)	This is the sum over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line, divided by the poverty line. It is the measure of the depth of poverty, however, with limitations since it is insensitive to how consumption is distributed among the poor mainly below the poverty line. P1 is the per capita cost of eradicating poverty, as a percentage of the poverty line, if money could be targeted perfectly.
Prison	Place where people are kept as a punishment for crimes they have committed or while awaiting trial.
Prisoner	A person kept in prison as a punishment for a crime or while waiting for trial.
Proportional morbidity ratio	This is the proportion attributable to a given cause of illness. It is a proxy for the prevalence of sickness in a population.
Producer Price	The producer price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any VAT, or similar deductible tax, invoiced to the purchaser.. It excludes any transport charges invoiced separately by the producer.
Regional Referral Hospitals	In addition to the services offered at the general hospital, these hospitals offer specialist services such as psychiatry, ear, nose and throat (ENT), radiology, pathology, ophthalmology as well as higher level surgical and medical services, including teaching and research.
Relative Humidity	This is a measure of the amount of water vapor/moisture in the air (at a specific temperature) compared to the maximum amount of water vapor air could hold at that temperature, and is given as a percentage value. Relative humidity depends on the temperature of the air, as warm air can hold more moisture than cold air. Relative humidity of 100 percent indicates that the air is holding all the water it can at the current temperature and any additional moisture at that point will result in condensation.
Residents	Persons whose usual residence is Uganda including those whose nationality is not Ugandan.
Retained Reserves	This is the increase in value of a currency or the increase in value of fixed assets consisting mainly of freehold land and buildings.

Revaluation reserves	Reserves arising due to the revaluation of fixed assets but cannot be paid out as dividends because they are not realised profits. They merely restate the value of an asset.
Separated	A situation where married couples separate from each other without legalizing the separation, and hence can re-unite after some time. However they are still regarded as married from the legal point of view.
Single	A man or woman who has never been married or never been in a consensual union.
Solid waste	Any semisolid or solid matter created by human or animal activities, and which are disposed because they are hazardous or useless.
Squared Poverty Gap (P2)	This is the sum over all individuals of the square of the shortfall of their real private consumption per adult equivalent and the poverty line divided by the poverty line. The reason to square the shortfall is to give greater weight to those who are living far below the line. The indicator caters for a policy which also makes transfers from someone just below the poverty line to the poorest person which P1 does not reflect.
Teaching Service	Teaching Service comprises of teachers of primary schools, secondary and technical schools, commercial and technical colleges and institutions.
Trade Balance	The difference in value between the country's visible imports and exports.
Traditional Civil Servants	Employees of line ministries and self-accounting government departments.
Traditional Exports	Long-term export cash crops introduced to Uganda long time ago. That is Coffee, Cotton, Tea and Tobacco.
Treasury Bill	Short-term bearer securities with maturities of 91 days, 182 days, 273 days or 364 days issued by Bank of Uganda.
Underemployment	Persons who work less than 40 hours per week, but were willing and available to work additional hours within the last seven days.
Value Added	The value of outcome when factors of production interact to produce and avail goods and services. Value added is the difference between the value of gross output and the value of intermediate inputs. Value added comprises of the following: <ul style="list-style-type: none"> (a) Compensation of employees (b) Consumption of fixed capital (depreciation) (c) Licenses (d) Rent (e) Interest (f) Operating surplus (usually) net profit or loss and other small items
Value Added Tax (VAT)	A form of consumption tax. From the perspective of the buyer, it is a tax on the purchase price. From the seller's perspective, it is a tax only on the value added to a product, material or service.
Wage Bill	All cash payments made by employers in return for labour provided by the employees. The payments include salaries and wages, overtime, holiday pay, bonuses, COMMISSIONS , sick leave and any other allowances paid in cash to the employees.
Widowed	A situation where one partner in a marriage is dead. It applies to both monogamous and polygamous marriages. In case of polygamous marriages where the man is dead, the women are referred to as widows. However, where a man loses one of his many WIVES , he cannot be referred to as a widower.

GENERAL INFORMATION

Geographical Indicators

Latitude	4°12'N & 1°29'S
Longitude	29°34'E & 35°0'E
Altitude (minimum ASL)	620 metres
(maximum ASL)	5,110 metres
Total surface area	241,550.7 km ²
Area under land	199,807 km ²
Area under water and swamps	41,743 km ²
Temperature	16-30°C
Rainfall	850 -1700 mm/year

2012 Economic Indicators

GDP at current market prices	53,202 billion Shs
Per capita GDP at current market prices	1,531,227Shs
GDP growth rate at constant (2002) market prices	2.8 percent
Per capita GDP growth rate at constant (2002) market prices	-0.8 percent
Contribution of agriculture to GDP at current market prices	22.2 percent
Reserves	-522.2 million US\$
Inflation rate	14.0 percent
Budget deficit excluding grants as a percentage of GDP (2012/13)	6.4 percent

Demographic and socio-economic indicators

Total population (2013 mid-year)*	35.4 million
Percentage urban (2013 mid-year)*	18.1 percent
Population of Kampala city (2013 mid-year)*	1.79 million
Sex ratio of total population (2002 census)	95 males per 100 females
Population density (2002 census)	123 persons /km ²
Infant Mortality rate (2002 census)*	76 per 1000 live births
Life Expectancy at birth (2002 census)*	50.4 years
Male	48.8 years
Female	52.0 years
Pupil Teacher ratio (Primary 2012)	48
Pupil Classroom ratio (Primary 2012)	57
Student Teacher ratio (Secondary 2012)	32
Student Classroom ratio (Secondary 2012)	57

Note: * Demographic projections were based on the Census 2002 final results.
Only population of gazetted city, municipalities and towns was considered as urban population.

MILLENNIUM DEVELOPMENT GOALS PROGRESS FOR UGANDA AS AT 2010

Goal 1: Eradicate extreme poverty and hunger	
Target 1.A: Halve, between 1990 and 2015, the proportion of people whose income is less than one dollar a day	ON TRACK
Target 1.B: Achieve full and productive employment and decent work for all, including women and young people	NO TARGET
Target 1.C: Halve, between 1990 and 2015, the proportion of people who suffer from hunger	ON TRACK
Goal 2: Achieve universal primary education	
Target 2.A: Ensure that, by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling	SLOW
Goal 3: Promote gender equality and empower women	
Target 3.A: Eliminate gender disparity in primary and secondary education, preferably by 2005, and in all levels of education no later than 2015	ON TRACK
Goal 4: Reduce child mortality	
Target 4.A: Reduce by two thirds, between 1990 and 2015, the under-five mortality rate	SLOW
Goal 5: Improve maternal health	
Target 5.A: Reduce by three quarters, between 1990 and 2015, the maternal mortality ratio	SLOW
Target 5.B: Achieve, by 2015, universal access to reproductive health	SLOW
Goal 6: Combat HIV/AIDS, malaria and other diseases	
Target 6.A: Have halted by 2015 and begun to reverse the spread of HIV/AIDS	REVERSAL
Target 6.B: Achieve, by 2010, universal access to treatment for HIV/AIDS for all those who need it	ON TRACK
Target 6.C: Have halted by 2015 and begun to reverse the incidence of malaria and other major diseases	SLOW
Goal 7: Ensure environmental sustainability	
Target 7.A: Integrate the principles of sustainable development into country policies and programmes and reverse the loss of environmental resources	SLOW
Target 7.B: Reduce biodiversity loss, achieving, by 2010, a significant reduction in the rate of loss	SLOW
Target 7.C: Halve, by 2015, the proportion of people without sustainable access to safe drinking water and basic sanitation	ON TRACK
Target 7.D: By 2020, to have achieved a significant improvement in the lives of at least 100 million slum dwellers	NO TARGET
Goal 8: Develop a global partnership for development	
Target 8.B: Address the special needs of the least developed countries	REVERSAL
Target 8.D: Deal comprehensively with the debt problems of developing countries through national and international measures in order to make debt sustainable in the long term	ACHIEVED
Target 8.E: In cooperation with pharmaceutical companies, provide access to affordable essential drugs in developing countries	STAGNANT
Target 8.F: In cooperation with the private sector, make available the benefits of new technologies, especially information and communications	ON TRACK

UGANDA 2011 DISTRICTS BY STATISTICAL SUB REGIONS

CHAPTER ONE

1 ENVIRONMENT STATISTICS

This section presents statistics on land area, coverage and use, forestry, climate and water supply.

1.1 Land

Uganda has an area of 241,550.7 square kilometres (sq.km), of which 41,743.2 sq km are open water and swamps while 199,807.4 sq km is land. The altitude above sea level ranges from 620 metres (Albert Nile) to 5,111 metres (Mt. Rwenzori peak). Uganda shares Lake Victoria with Kenya and Tanzania and Lakes Albert and Edward with the Democratic Republic of Congo (DRC). Within its boundaries are lakes; Wamala, Bunyonyi, Katwe, Nakivale, Mbuho, Kyoga, George and Bisina. The three major rivers in Uganda are Aswa, Kagera and the Nile. There are many other rivers and streams that drain into wetlands and lakes or form tributaries and sub-tributaries to the major rivers.

Some parts of the western, southern and eastern borders are marked by mountains. The Rwenzori Mountains, (often called the Mountains of the Moon) form about 80 kilometres of the western border between Uganda and Democratic Republic of Congo. The Mufumbira volcanoes, which reach 4,132 metres above sea level, mark the Southern border with Rwanda and Democratic Republic of Congo. In Eastern Uganda, the border with Kenya is also marked by Mount Elgon, which rises to a height of 4,324 metres. The Imatong Mountains, rising to 3,029 metres above sea level, mark the border with South Sudan. Within the boundaries of Uganda in the North East of the country is Mount Moroto which is 3,085 metres above sea level.

The vegetation is mainly composed of savannah grassland, woodland, bushland and tropical high forest. Table 1.1.1 below shows the national land cover in sq.km. by type. The cultivated land cover being the largest increased from 84,010 sq. km. in 1990 to 99,018.6 sq.km. in 2005. The second in size are the grasslands which remained constant at 51,152.7 sq km over the same period. Notably, the bushlands and woodlands decreased from 14,223.9 sq.km. and 39,740.9 sq.km. in 1990 to 11,893.6 and 29,527.8 sq.km. in 2005 respectively. Similarly, plantations (hard and soft woods), tropical high forest (depleted and normal) have decreased over the same period.

Table 1.1.1: National Land Cover Statistics (sq km)

Type of land cover	1990	2000	2005
Built-Up Areas	365.7	365.7	365.7
Bush-lands	14,223.9	12,624.5	11,893.6
Commercial Farmlands	684.5	684.5	684.5
Cultivated Lands	84,010.0	94,526.7	99,018.6
Grasslands	51,152.7	51,152.7	51,152.7
Impediments	37.1	37.1	37.2
Plantations - Hardwoods	186.8	153.3	138.6
Plantations - Softwoods	163.8	80.0	121.5
Tropical High Forest	2,740.6	2,248.2	2,036.3
Tropical High Forest Normal	6,501.5	5,333.5	4,830.6
Water Bodies	36,902.8	36,902.8	36,902.9
Wetlands	4,840.4	4,840.4	4,840.6
Woodlands	39,740.9	32,601.4	29,527.8
Total	241,550.7	241,550.7	241,550.7

Note: The figures indicated in the above table are based on projections. Actual vegetation studies were undertaken in 1994 based on 1992 satellite imagery

1.2 Forests

1.2.1 Local and Central Forest Reserves

The proportion of land under Central Forest Reserve (CFR) was higher than that under Local Forest Reserve (LFR) in all the regions as established by the National Bio-mass Study, 2005. The Eastern region had the largest proportion under LFR (2.6 percent) while Western Region had the lowest proportion under LFR (0.1 percent).

Table 1.2.1: Share of Total Area under Forests by Region, 2005

Region	CFR		LFR		Total Forest Reserve Area
	Hectares	(Percent)	Hectares	(Percent)	Hectares
Central	303,358	99.5	1,576	0.5	304,934
Eastern	56,479	97.4	1,531	2.6	58,010
Northern	556,825	99.7	1,447	0.3	558,272
Western	356,037	99.9	431	0.1	356,468
Uganda	1,272,699	99.6	4,985	0.4	1,277,684

CFR – Central Forest Reserve

LFR – Local Forest Reserve

1.2.2 Consumption of Charcoal and Firewood

Table 1.2.2 shows the value of household expenditure on firewood and charcoal as estimated from the Uganda National Household Surveys (UNHS). The total nominal value increased to 409.1 billion in 2009/10 from Shs. 32.8 billion in 2005/06. The value of charcoal and firewood consumption went up by more than 10 times during the same period.

Table 1.2.2: Household Consumption of Firewood and Charcoal (Mill. Shs)

Item	1996/97	2002/03	2005/06	2009/10
Charcoal	4,076	6,936	9,345	98,699
Firewood	13,967	20,677	23,425	310,440
Total	18,043	27,613	32,770	409,139

Source: UBOS

1.2.3 Production of Round Wood

Table 1.2.3 shows the quantity and value of round wood produced in Uganda for the last five years. In 2012, Uganda produced 42.9 million tonnes of round wood worth about Shs 572 billion, registering an increment of 21.3 percent in value (Statistical Appendix Table 1.2 A and 1.2 B).

Table 1.2.3: Production of Round Wood

Category	2008	2009	2010	2011	2012
Quantity ('000 tonnes)	36,324	37,857	39,467	41,161	42,889
Value (Mill. Shs)	328,373	346,840	399,599	471,499	571,643

Source: National Forestry Authority

1.3 Climate

1.3.1 Rainfall

This section presents the Long Term Average and Monthly rainfall trends for the year 2012 for selected centres including; Soroti, Arua, Mbarara, Kampala, Kasese, Lira, Masindi and Tororo. Rainfall information for these seven (7) centres is presented in Appendix Table 1.3 A.

Soroti received a total of 1,404 millimetres of rainfall in the year 2012 (Figure 1.3.1 (a)). A pattern similar to that of the long term average (2008-2012) rainfall was received in Soroti in 2012 with the amount of rainfall increasing gradually from January to March (although below the long term average), before sharply increasing to 305 millimetres in April above the long term average of 157 millimetres. The centre received total rainfall above the long term average in the months of August, September, November and December. However, the centre did not receive any rainfall in January.

Figure 1.3.1 (a): Soroti 2012 Monthly and Long Term Average Rainfall (mm)

Mbarara received a total of about 1,180 millimetres of rainfall in 2012 with the rainfall pattern being similar to that of the long term average (2008-2012) for most of the months. For half of the months, Mbarara received generally higher rainfall than the long term average. The highest amount of rainfall (208 mm) in the area was received in the month of April which was far above its long term mean (91 millimetres). On the other hand, the lowest amount of rainfall was received in the month of January (1 millimetre) as shown in Figure 1.3.1 (c) and Statistical Appendix Table 1.3 A.

Figure 1.3.1 (c): Mbarara 2012 Monthly and Long term Rainfall (mm)

shows mean relative humidity at 06:00 hours for the selected centres. Entebbe and Jinja have had a generally high mean relative humidity at 06:00 hrs throughout 2012 ranging between 64 and 87 percent. Gulu and Kasese recorded the lowest mean relative humidity at 6:00 hrs in June (58 percent) and July (59 percent) respectively.

Figure 1.3.4: Long Term Mean Relative Humidity at 06:00 hours for selected centres, 2012 (percent)

Figure 1.3.5 below shows the long term (2008-2012) mean relative humidity at 12:00 hours for selected centres. Entebbe and Jinja have had the highest mean relative humidity at 12:00 hours throughout the year ranging from 47 to 72 percent.

Figure 1.3.5: Long Term Mean Relative Humidity at 12:00 hours for selected centres, 2012 (percent)

1.4 Water Supply and Waste disposal

1.4.1 Metered Water

National Water and Sewerage Corporation (NWSC) is the main provider of metered water in Uganda, with a total capacity of 318,842 m³ per day. NWSC operates in 23 towns, 19 of which have water treatment workstations.

During the 2011/12, water production was 81.6 million cubic metres compared to 77.7 million cubic metres produced in the 2010/11, an increment of about 5.0 percent. Kampala and Bushenyi registered the highest increments in water production of 8.6 percent and 6.4 percent respectively. On the other-hand, Soroti, Tororo and Lugazi registered high declines of 14.5, 14.0 and 11.6 percent respectively (Statistical Appendix Table 1.4 A to C). Figure 1.4.1 below shows the national trends of metred water production by NWSC over the past five years.

Figure 1.4.1: Water produced by NWSC, 2007/08 – 2011/12

1.4.2 Unmetered Water

The Directorate of Water Development (DWD), under the Ministry of Water and Environment also supplies water especially in the rural areas and small towns through the provision of boreholes.

Over the years, there has been a general increase in the amount of water supplied by DWD. However, the figure 1.4.2 shows a decline in water supply from 3.9 million cubic metres in 2010/11 to 3.4 million cubic metres in 2011/2012. This decline in the amount of supplied water was as a result of missing data for about 15 towns (Statistical Appendix Table 1.4 D).

Figure 1.4.2: Trends in water supplied for small towns, 2007/08 – 2011/12

1.4.3 Solid Waste Disposal

This section presents information on Solid Waste Disposal collected using the CIS. Solid wastes include garbage (decomposable wastes from food), industrial and commercial waste, sewage sludge, wastes resulting from agricultural and animal husbandry operations and other connected activities, demolition wastes and mining residues. Waste can be disposed off on land, discharged into ground water or surface water or emitted into air. In this report solid waste disposal facilities have been classified into pit, skip/bin, bush, garden and others.

The findings revealed that, the highest proportion of households using pit facility to dispose off household waste was in Mbale and Zombo district accounting for 59.6 percent and 58.8 percent respectively. Meanwhile, the lowest proportion was reported in Napak district at 1.5 percent. Kyankwanzi had the highest proportion of households using skip/bin (39.4percent) while Napak had again the least proportion (5.1 percent) of households. For households using the bush to dispose off household waste, Napak had the highest proportion at 65.8 percent while Rakai and Mbale had the least proportion of households at 5.2 percent and 4.2 percent respectively. Kayunga and Kanungu had the highest proportion of households using garden as the main waste disposal at 42 percent, while Abim had the lowest at 2 percent.

Table 1.4: Distribution of Household Waste Disposal Facility for Selected CIS Districts, (Percent)

District	Total Households	Waste disposal facilities					Total %
		Pit	Skip/Bin	Bush	Garden	Others	
Central region							
Kayunga	61,554	27.3	7.8	20.5	42.2	2.3	100.0
Kiboga	24,664	23.6	31.1	10.3	31.5	3.6	100.0
Kyankwanzi	27,758	17.6	39.4	15.0	25.6	2.4	100.0

CHAPTER TWO

2 POPULATION AND SOCIAL STATISTICS

2.1 Population

Uganda's population has continued to increase rapidly over time. It increased from 9.5 million in 1969 to 24.2 million in 2002. Between 1991 and 2002 the population increased at an average annual growth rate of 3.2 percent. The population is estimated at 35.4 million by mid 2013 as shown in figure 2.1.1.

Figure 2.1.1: Population Census (1969, 1980, 1991 & 2002) and 2013 mid year projection

The highest average annual growth rate was 3.9 percent observed during the intercensal period of 1959-1969 (3.9 percent). Table 2.1.1 below shows the census population trend over the period 1911 to 2002.

Table 2.1.1: Population size, Inter-censal Population increases and average annual growth rates, 1911-2002

Census year	Population	Intercensal Interval	Average Annual Increase (000's)	Growth Rate
1911	2,466,125			
1921	2,854,608	1911-1921	39	1.5
1931	3,542,281	1921-1931	68	2.2
1948	4,958,520	1931-1948	83	2.0
1959	6,536,616	1948-1959	143	2.5
1969	9,535,051	1959-1969	300	3.9
1980	12,636,179	1969-1980	262	2.5
1991	16,671,705	1980-1991	367	2.6
2002	24,227,297	1991-2002	647	3.2

Source: Uganda Bureau of Statistics

2.1.1 Population Distribution by Age and Sex

Uganda's population pyramid (Figure 2.1.2) is broad based, which is characteristic of populations with a young age structure between 0 and 19 years. The population reduces as the age increases.

Figure 2.1.2: Population Pyramid in Five-Year Age Groups

2.1.2 Population of Special Interest Groups

Table 2.1.2 shows that the population of Uganda is increasingly becoming younger with the proportion of the children (under 18 years) having increased from 51 percent in 1969 to 56 percent in 2002. The proportion of the older persons (aged 60 years and above) on the other hand decreased from 6 percent in 1969 to about 5 percent in 2002.

Table 2.1.2 Percentage Distribution of the Population by Special Interest Groups, for the censuses; 1969, 1991 and 2002

Age Category	1969	1991	2002
Population Aged 6 – 12 Years	22.7	22.3	21.9
Population Aged less than 15 Years	46.2	47.3	49.4
Population Aged Less than 18 Years	51.4	53.8	56.1
Population Aged 10 – 24 Years	27.8	33.3	34.2
Population Aged 13 – 19 Years	12.9	15.8	16.3
Population Aged 15 – 24 Years	16.2	20.0	19.9
Population Aged 18 – 30 Years	21.7	23.6	22.3
Population Aged 60 Years or More	5.8	5.0	4.6

Source: Uganda Bureau of Statistics

2.1.3 Urbanisation

Urbanisation is defined as the increase in the proportion of the population living in urban areas. However, the definition of urban areas has been changing over time. The 2002 Census defined urban areas as only the gazetted ones while the earlier censuses included ungazetted trading centres with more than 1,000 people as part of the urban population.

Figure 2.1.3 shows that the urban population in Uganda increased from less than one million persons in 1980 to about three million persons in 2002, representing a nearly fourfold increase. However, between 2002 and 2013, the urban population is estimated to have rapidly increased to 6.4 million. This increase is mainly attributed to the creation of new urban administrative units, natural growth, demographic factors (excess of fertility over mortality), redefinition of the boundary of urban areas and to a lesser extent, Rural - Urban Migration.

Figure 2.1.3: Urban Population, 1980- 2013

Note: 1980, 1991 and 2002 data is from Population Census counts while the data for 2013 is an estimate.

2.1.4 Fertility

The fertility levels remained high over three decades up to 2006, with the Total Fertility Rate (TFR) of about 7 children per woman. Figure 2.1.4 below shows declining fertility levels since 2006. TFR has reduced to 6.2 children per woman (2011 UDHS). The fertility levels are higher in the rural areas compared to the urban areas with 6.8 and 3.8 respectively.

Figure 2.1.4: Total Fertility Rate (TFR) Trends, 1995- 2011

2.1.5 Mortality

There has been a general decline in mortality levels over time. Figure 2.1.5 shows the trend of Infant Mortality Rate (IMR) and Under Five Mortality over the period 1995 to 2011. The Infant Mortality Rate declined from 97 to 54 deaths per 1,000 live births between 1995 and 2011; while the under five mortality declined from 162 to 90 deaths per 1,000 live births over the same period. The Infant Mortality Rate was lower among children in urban areas as well as those born to educated and wealthier mothers (2011 UDHS).

Figure 2.1.5: Infant and Under Five Mortality Trends, 1995- 2011

2.1.6 Life Expectancy at Birth

Life expectancy at birth is an estimate of the average number of years a person is expected to live if a particular pattern of mortality is maintained. Table 2.1.7 shows that the over-all life expectancy at birth from 2002 Census was 50 years. Males registered a lower life expectancy of 49 years compared to their female counterparts at 52 years. There was a gain of 2.3 years in life expectancy between 1991 and 2002.

Table 2.1.7: Life Expectancy at Birth by Census Year 1969- 2002

Census Year	Male	Female	Total
1969	46.0	47.0	46.5
1991	45.7	50.5	48.1
2002	48.8	52.0	50.4

Source: Uganda Bureau of Statistics

2.1.7 Vulnerable Children

This section presents selected statistics on vulnerable children that were collected using the CIS. A vulnerable child is a person below 18 years living in a situation that exposes him/her to significant, emotional or mental harm. In this report vulnerable children (VCs) include i.e. children out of school aged 6 – 17 years, Child headed households (aged 5 – 17 years), working children (5 – 17 years) and children aged 12- 17 years who are married. Appendix Table 2.1.E shows the type of vulnerability for the different age groups.

2.1.7.1 Children Heading Households

Child-headed households are households where all members are under 18 years. In most cases these children have no adult person looking after them and are therefore vulnerable. This is the definition of child-headed households used in this report. During 2009, Zombo district reported the largest proportion of households headed by children year at 1.2 percent, followed by Nebbi district at 0.7 percent while Kiryandongo and Ngora had the least proportion at 0.1 percent. During 2010 Amolatar district did not report any child headed households while, Kanungu had the least proportion of 0.1 percent in 2011. (Statistical Appendix Table 2.1.E)

2.1.7.2 Early Marriages

Information on the marital status of household members aged 12 years and above was obtained during the CIS. Categories under marital status included single, married/ cohabiting, divorced, separated and widowed. Findings for children aged 12 – 17 years showed that, among the CIS districts in 2011, Abim district had the highest proportion of married children, 22.3 percent. (Statistical Appendix Table 2.1 E).

During 2009, Zombo district had the highest proportion of early marriages at 14.0 percent while Ngora, Kiruhura and Kumi districts had the least proportions at 1.2 percent, 1.3 percent and 1.4 percent respectively.

2.1.7.3 Orphaned Children below 18 Years

Information on the survival status of parents for children aged below 18 years was obtained during the CIS. The findings in 2009 revealed that Rakai district had the highest proportion of children below 18 years who were double orphaned (both parents are dead) at 5.9 percent, while Kyankwanzi had the least proportion of orphans at 0.6 percent. Data also indicates the proportions of children whose parental survival status was not known by the respondents and also those children whose parental survival was not stated by the respondents. (Statistical Appendix Table 2.1.F)

2.2.2.3 Secondary School Orphans by Class

The number of orphaned students increased from 264,098 in 2009 to 278,996 in 2010, an increase of 5.6 percent as shown in Table 2.2.9 below.

Table 2.2.9: Secondary School Orphan Students by Sex, (2007 – 2010)

Year	Male	Female	Total	% age of Enrolment
2007	119,147	112,616	231,763	24
2008	96,868	90,234	187,102	17
2009	134,916	129,182	264,098	22
2010	142,508	136,488	278,996	23

2.2.3 Tertiary Education

In 2011, Uganda had a total of 32 universities and 133 tertiary institutions. Table 2.2.7 indicates that 71 percent of the tertiary enrolment in 2011 was from universities with females accounting for 44 percent. (Statistical Appendix Tables 2.2.G and H)

Table 2.2.7: Higher Institutions Enrolment, 2011

Institutions	Number of Institutions	Enrolment		
		Male	Female	Total

2.2.4 Literacy Levels

Literacy is defined as the ability to read with understanding and write a meaningful statement in any language. The 2009/10 Uganda National Household Survey showed an overall literacy rate of 73 percent among persons aged 10 years and above. Table 2.2.8 indicates that men were more literate compared to the women with literacy rates of 79 percent and 66 percent respectively. A trend analysis indicates an increase in the literacy rate over the years for persons 10 years and above from 70 percent in 2002/03 to 73 percent in 2009/10.

Table 2.2.8 Literacy Rates for Population Aged 10 Years and Above

2.3 Labour Force, Employment and Earnings

This section presents information on labour market indicators such as labour force, employment, earnings, underemployment, unemployment and demand for labour. The section further shows changes in the employment pattern for selected establishments in the manufacturing and hotel & restaurant sectors. The major sources of this information include the bi-annual Uganda National Household Surveys (UNHS), the Annual Urban Labour Force Surveys (ULFS), the Industrial Establishment Surveys and administrative records. Some of the data presented in this edition differs from previous editions following the adoption of the recent revisions of the ILO definitions.

2.3.1 Key Labour Market Indicators

In Uganda, the working age population is defined as the population aged 14-64 years. However, the International Labour Organisation (ILO) and other international agencies define the working age population as persons aged 15-64 years. The Labour Market Indicators given in this publication are based on the data from the Uganda National Household Surveys (UNHS) 2005/06 and 2009/10. The summary of the Key labour market indicators are presented in Appendix Table 2.3.A.

The total labour force in Uganda increased from 10.9 million persons in 2005/06 to 13.4 million persons in 2009/10, an increase of 23 percent. The increase in the labour force is mainly due to significant increase in the young population entering the working age bracket which offsets the reduction in the older population leaving the working age bracket and eventually join the labour force. The female constituted 52.5 of the labour force during 2009/10 survey compared to 51 percent during the 2005/06 survey. The Labour Force Participation Rate (LFPR) increased from 81.4 percent in 2005/06 to 91.5 percent in 2009/10. The overall unemployment rate was 3.6 percent in 2009/10 while the urban unemployment rate was about 8.7 percent in 2009/10. The time related underemployment rate was about 3.2 percent in 2009/10.

In 2009/10, 79.5 percent of the working population was self-employed, a decrease from 82.3 percent in the previous survey. The paid employees constituted 20.6 percent of the work force in 2009/10 compared to 16.7 percent in 2005/06. The increase was partly as a result of expansion of available business ventures (mainly informal) between the survey years. In 2009/10, the education level of the working population was low at 7.4 percent, that is, nearly three quarters of the labour force had either primary level or no education (Appendix Table 2.3 A). Only 6.8 percent of the labour force had specialized training of post primary or higher.

Over this period, the median monthly earnings for persons in paid employment increased by 47.3 percent from shs. 54,300 to shs. 80,000 in nominal terms. In real terms, the increase was not significant (from shs. 36,200 to shs. 37,735).

The majority of the working population was engaged in agriculture. The agriculture industry employed 66.0 percent of the working population, (Statistical Appendix Tables 2.3 B and 2.3 C). However, the contribution of the agriculture industry to employment was on a downward trend between 2005/06 and 2009/10.

Figure 2.3.1: Proportion of the Working Population who are Poor, 2005/06 and 2009/10

2.3.3 Youth Employment Indicators

A youth is any person who is aged 18-30 years. Table 2.3.2 presents selected indicators of the youth employment from the National Labour Force and Child Activities Survey, 2011/12. The survey identified a total of 6.3 million youths in Uganda, out of which females constituted 51 percent of the youth labour force. The overall Labour Force Participation Rate among the youth was 71 percent, with 75 percent among the males and 67 percent among the females. Informal employment accounted for the highest proportion of employed youths outside agriculture. Information also showed that 19 out of every 20 employed youths in non-farm agriculture enterprises were in informal employment.

Table 2.3.2 also indicates that 15 percent of the youths (18-30 year-olds) were engaged exclusively in schooling while 60 percent were engaged exclusively in employment. Notably are the eight percent who were combining work and schooling. About one fifth (18 percent) of the youth population were jobless, that is, either unemployed or economically inactive and not in school.

Unemployment according to the survey was low among the youth population with only five percent of those in the labour force. However, the youth unemployment rate in Kampala was thrice (15 percent) the national youth unemployment rate, which underscores the difference in the structure of the urban and rural labour markets. Almost 13 percent of the working youth were in time related underemployed.

Table 2.3.3: Selected Labour Force Indicators for persons aged 14-64 years

Indicator category	Urban Labour Force Survey		
	2009	2010	2011
Size of labour force (000's)	920	1,098	1,154
Size of the working population (000's)	797	958	1,051
Activity Rates			
LFPR	69.3	72.2	63.4
EPR	60.0	63.0	57.7
Unemployment rate	13.3	12.6	9.1
Underemployment			
Time related	12.2	4.8	9.6
Skills related	12.7	11.9	9.5
Income related	4.0	13.9	17.1
Average usual hours worked (per week)	65.4	65.1	69.4
Median monthly wages - Paid employees ('000)	150	152	200
Activity Status of the Work Force			
Self employed	50.2	51.9	54.4
Paid employee	49.8	48.1	45.6
Broad Sectors of Employment			
Agriculture	6.1	8.1	4.7
Production	14.9	16.4	17.4
Service	78.6	75.5	77.9
Informal employment	88.6	85.0	91.5

Source: Urban Labour Force Survey 2009, 2010 and 2011, UBOS

The structure of the working population in the Greater Kampala was different from that of the country as a whole. While the majority of the working population (70 percent) was employed in the primary sector, in the Greater Kampala area over 76 percent of the working population was employed in the service sector in the period under review.

Figure 2.3.2: Comparison of Sector contribution to employment by UNHS2009/10 and ULFS 2010

2.3.5 Children Engaged in Economic Activities

Information on the main economic activity of all household members aged 5 years and above during the last 12 months was obtained during the 2009, 2010 and 2011 CIS data collection. The main economic activity was an activity in which a person spent more time compared to other activities during the last 12 months. Among the CIS districts during 2009, Bukomansimbi district had the largest number of Children aged 5 – 17 years involved in economic activities. This was more prevalent in Butenga and Kibinge sub counties where 93.6 percent and 65.6 percent respectively, of the children aged 5 -17 years were involved in economic activities. On the other hand, during 2011 Kanungu district had the least proportion of children involved in economic activities at 4.5 percent. (Statistical Appendix Table 2.1.E)

2.3.6 Demand for Labour

Job advertisements portray the demand side of the labour market in the economy. In the absence of data to determine the national labour force demand, UBOS compiles data on jobs advertised in the two major English Newspapers (New Vision and Daily Monitor). The data from these advertisements is used as a proxy for demanded labour in the country².

Figure 2.3.3 below shows the trend in the number of jobs advertised between 2008 and 2012. A total of 17,106 jobs were advertised in the year 2012, reflecting an increase of 42.8 percent compared to 11,978 jobs in the year 2011. The trend over time shows that there were fluctuations in the number of jobs advertised since the year 2008, with significant reduction in the number of jobs advertised in 2011.

Figure 2.3.3: Number of advertised vacancies by year (2008 – 2012)

The civil service employment grew by 1.6 percent between 2009 and 2010, however the news papers jobs advertisements increased from 20,223 to 24,372 (20.5 percent). During 2010, 79.5 percent of the jobs advertised were for public administration sector (Statistical Appendix Table 2.3 G).

2.3.6.1 Advertised Jobs by Industry (ISIC Rev3)

Over the period 2008-2012, the majority of the jobs advertised were in the Public Administration sector, (Statistical Appendix Table 2.3 G), however, its share has been fluctuating. The share of the jobs advertised in the public administration sector increased from 49 percent in 2011 to 54 percent in 2012. The jobs in the community, social and personal services (excluding education and health) constituted 14 percent of the news papers' job advertisements during 2012. In 2012, about 18.2 percent of the advertisements were in social sectors of health and education compared to 9 percent in 2011.

2.3.6.2 Advertised Jobs by Professional Categorisation

Half of the occupations advertised (49.2 percent) in 2012 were for professionals (degree holders) followed by associate professionals (diploma and certificate holders) constituting 39 percent of all the jobs advertised in 2012, (Figure 2.3.4). The other jobs constituted a small proportion (12 percent). It should be noted that while professionals and associate professionals jobs tend to require to be advertised before filling them, most of the casual jobs may be filled without advertisement though they form the majority of the new jobs created.

² A job is captured only once even if it is advertised in more than one newspaper or more than once in the same newspaper.

Figure 2.3.4: Distribution of Advertised Vacancies by Occupation – ISCO 88 (2010-2012)

Table 2.3.5 shows the job advertisements and the regions where the work place is situated i.e. where the applicants are expected to work. Overall, about three quarters of the jobs advertised have their designated work places in Kampala district. The proportion is higher and almost similar for professionals and associated professionals.

Table 2.3.5: Disaggregated Job Advertised by Region (Designated Workplace) - 2012

	Professionals (degree)	Associate professionals (diploma/certificate)	Clerks	Others	Total
Kampala	77.9	76.8	61.3	63.7	75.7
Central	5.6	4.5	8.4	10.5	5.7
Eastern	4.1	3.7	7.9	8.9	4.5
Northern	6.0	7.2	8.9	6.0	6.6
Western	6.3	7.8	13.5	10.9	7.5
Total	100	100	100	100	100
Number	8,411	6,666	643	1,386	17,106

2.3.6.3

2.3.6.4 Re-advertised jobs

Out of 17,106 jobs advertised in 2012, 134 (one percent) were re-advertised as indicated in Table 2.3.6. The majority of the re-advertised jobs were for professional (86 percent) jobs followed by the associate professional category with 12 percent during 2012. The pattern of readvertised jobs has been observed with the number being higher in 2009. The year 2010 recorded the least number, (37.7 percent), of the readvertised jobs for professionals during the period.

Table 2.3.6: Number of jobs re-advertised by major occupation groups, 2009 – 2012

Occupation (ISCO 88)	2009	2010	2011	2012
Professionals (Graduates)	51.2	37.7	74.1	85.8
Associate professionals (Diploma and certificate holders)	36.9	54.4	10.4	11.9
Others	11.9	7.9	15.5	2.1
Total	100	100	100	100
Number	1,250	353	316	134

Note: No information was captured for 2008

Source: New Vision and The Monitor newspapers

2.3.7 Employment in the Civil Service

The employment in Civil Service is composed of persons employed in the traditional civil service (Line Ministries), teaching service (primary and secondary), Police, Prisons, Public Universities and the Local Governments. However, it excludes employees of semi autonomous institutions and parastatal bodies. The

largest share of the monthly wage bill (27.5 percent) as indicated in the Statistical Appendix Tables 2.3 J, and 2.3 K.

The average monthly income of employees was shs. 460,000 in 2012 as indicated in Statistical Appendix Table 2.3 L. Employees in paper, publishing and printing industry had the highest average monthly income of shs. 1,712,000, followed by those in metal products industry with shs. 751,000. The rest, which include food processing, beverages and tobacco, textiles, cloth and foot wear, cement, clay and ceramic products, hotels and restaurants, and miscellaneous received an average monthly income less than shs. 500,000. Employees in the food processing, beverage and tobacco group earned the least average monthly income of shs, 270,000.

2.3.8.1 The Labour Cost Index

A Labour Cost Index measures the rate of change in the total labour cost. It provides a measure of wage pressure. The labour cost index from the data on employees' wages for the 121 major manufacturing and hotels and restaurants establishments selected for the compilation of the Index of Industrial Production (IOP) and Producer Price Index (PPI). All the establishments covered are from the formal sector. The base year is 2008. The Labour Cost Index in real terms increased to 104.2 in 2012.

Figure 2.3.5: Labour Cost Index for Nominal and Real Wage (2008 =100)

The manufacture of chemicals paint, soap and foam had the highest labour cost index of 141.2 percent in real terms during 2012 in relation to 2008 (Statistical Appendix Table 2.3 M). The Labour Cost Index in real terms for manufacture of bricks and cement industry declined to 68.3 percent in 2012 from 2008 value.

Food processing, beverages and tobacco sector which was dominant in terms of persons engaged had a labour cost index in real terms of 107 percent compared to the reference period, while the paper, publishing and printing sector which had the highest average wages had a labour cost index in real terms of 97 percent in 2012 compared to the base period.

2.4 Household Expenditure and Poverty

Income and expenditure data are useful in monitoring the living standards of Ugandans. However, household consumption expenditure is usually preferred over income in assessing poverty incidence since it is better accurately reported by the households/individuals. The 2009/10 Uganda National Household Survey (UNHS) collected information on consumption and non-consumption expenditure of households⁴. For the analysis in this section, the Central region excludes Kampala city.

2.4.1 Consumption expenditure per household

Figure 2.4.1 presents the monthly consumption expenditure per household for 2005/06 and 2009/10 after adjusting for inflation (using the 2005/06 consumer prices). Uganda's average household monthly expenditure rose from US\$ 210,750 in 2005/06 to US\$ 232,700 in 2009/10, representing a real increase of 10.4 percent within this period. The increase was mainly driven by observed increases in the rural areas (of 11.8 percent) while the urban areas registered an increase of 3 percent between the same period (Statistical Appendix Table 2.4A).

The increase in consumption expenditure was more pronounced in the Northern region (34 percent) while the Western region registered the lowest increase (3 percent). Notably, the urban areas of the Western and Eastern regions registered negative changes in consumption per household.

Figure 2.4.1: Monthly Consumption Expenditure (000) per Household (2005/06=100)

2.4.2 Real Consumption Expenditure Per Capita

In nominal terms, the results indicated that per capita consumption expenditure increased from US\$ 41,300 in 2005/06 to US\$ 72,250 in 2009/10, representing a nominal increase of 75 percent. However, after deflating nominal expenditure using the Consumer Price Index (CPI), the results revealed that on average, the per capita expenditure increased from US\$ 40,550 to US\$ 47,150 representing a real change of 16 percent (Statistical Appendix Table 2.4B). The Northern region had the highest real per capita expenditure increase from US\$ 21,500 to US\$ 28,400 (about 32 percent). Proportionately the Central region (excluding Kampala City) also registered a 31 percent increase in real per capita consumption expenditure. The lowest increase (9.6 percent) was observed in the eastern region from US\$ 31,800 to US\$ 34,850 per month per capita. On average, the urban areas recorded a 20 percent increase in real per capita consumption expenditure while the rural areas recorded a 15 percent real increase.

⁴ For details of items covered, refer to the Uganda Bureau of Statistics: 2009/10 Socio-Economic Module Abridged Report

2.4.5 Inequality in Household Consumption

The Gini coefficient is a measure of inequality in household consumption per adult equivalent. Based on 2009/10, inequality of income as measured by the Gini coefficient stood at 0.426. Decomposing by location, inequality was driven largely by urban areas (0.447). Inequality varied from 0.319 in the Eastern region to the highest coefficient of 0.451 in the Central region in 2009/10. This implies that, individuals in the Eastern region are least unequal, while the most unequal are in the Central region.

Note that the distribution of income became less unequal between the 2002/03 and 2009/10 surveys. In addition, growth in consumption was positive and strong during the same period. Consequently, absolute poverty declined between the two periods.

Table 2.4.5: Gini Coefficients for Uganda

Residence	1992/93	2002/03	2005/06	2009/10
Rural/Urban				
Urban	0.396	0.483	0.432	0.447
Rural	0.328	0.363	0.363	0.375
Region				
Central	0.395	0.460	0.417	0.451
Eastern	0.327	0.365	0.354	0.319
Northern	0.345	0.350	0.331	0.367
Western	0.319	0.359	0.342	0.375
National	0.365	0.428	0.408	0.426

2.4.6 Poverty Dynamics from 2005/06 to 2010/11

Cross sectional household surveys provide snapshots of the levels of poverty. However, to obtain a better understanding of the changes in poverty and how it evolves overtime requires tracking the poverty status of households. This enables one to identify those persons who remained poor, those who moved into or out of poverty and the factors that influence such changes in welfare status overtime. This section provides some highlights of the findings based on the 2010/11 Uganda National Panel Survey (UNPS).

The strength of household consumption expenditure measure is in its ability to provide insights into economic wellbeing beyond those obtainable from looking at income or wealth. In both surveys, all purchases by household members, items received free as gifts and home produced were valued. The advantage of the panel survey is that it allows for the understanding of the changes in welfare of individuals overtime. It provides insights into the dynamics of poverty and how different individuals are affected under different settings. Table 2.4.6 shows that 10 percent of the population has persistently remained poor since 2005/06. Female headed households are more likely to be chronically poor than male headed households. The persistence of poverty is more rampant in the northern region where 26 percent of all the chronically poor reside.

Being deprived of access to basic goods and services because of the inability to control the means of acquisition is a challenge that many people face. The expectation is that all people should progressively move out of the poverty bracket. Table 2.4.6 shows that 43 percent of the population drifted into and out of poverty during the period. The mobility into and out of poverty was more pronounced in the Eastern (55 percent) and Northern (49 percent) regions.

There is a correlation between the level of education and mobility in the different states of welfare. Those with some primary or no education at all are more likely to experience high levels of mobility than those with education levels above secondary. The probability of changing state varies by sector of employment. Those employed in agriculture (51 percent) are more likely to move into and out of poverty than those in the services or manufacturing sector.

Despite the volatility of a significant population on the welfare ladder, 47 percent have remained non poor since 2005/06. The majority are found in Kampala (88 percent), Central (72 percent) and Western (52 percent). Interestingly, those who have managed to keep out of poverty are largely employed in services and manufacturing sectors.

Table 2.4.6: Poverty dynamics 2005/06-2010/11 (Percent)

Variable		Poverty Status			Total
		Non-Poor All Three Years	Moved In And Out Of Poverty	Poor All Three Years	
Sex of hh Head	Female	45.9	41.5	12.6	100

2.4.7 Summary of Findings

The period 2005/06-2009/10 was marked, on average, with a positive growth in per adult consumption though the growth was not as strong as that observed in the period 2002/03-2005/06. It is further observed that growth between the two recent periods seems to have benefited more the affluent than average Ugandans. While the proportion of people living in poverty significantly declined, the reduction in the number of poor persons – in absolute terms – was not significant; and inequality of income worsened. In other words, while Uganda seems to have met the MDG target of halving income poverty target earlier than 2015, worsening distribution of income and high population growth, if not addressed, are likely to reverse the trends.

The 2010/11 panel survey reports a significant proportion of the population transiting between different states of welfare, implying that probably the income streams for this population is unstable and changes as the welfare status changes. More insights into the causes of this high mobility need to be further explored to inform policy decisions. Notable also is the fact that about 10 percent of the poor have remained chronically poor since 2005/06. This section of society has missed out on the past and present development opportunities and ought to be targeted for all inclusive prosperity programs.

2.6 Crime

This section presents data on various forms of crimes and remedial measures. The data is obtained from the Uganda Police Force and the Uganda Prisons Service.

2.6.1 Police cases

Figure 2.6.1 presents information on the number of reported, investigated and prosecuted crimes. The number of reported crimes shows a declining trend between 2008 and 2012. On the other hand, the number of reported crimes declined marginally by six percent between 2011 and 2012 compared to the number of investigated and prosecuted cases which slightly increased between 2011 to 2012.

Figure 2.6.1 Number of Crimes by category ('000s), 2008-2012

2.6.2 Serious crimes

The Uganda Police Force defines serious crimes to include homicides, aggravated robbery, defilement, murder, rape, burglary, child stealing and child trafficking. Table 2.6.1 shows that a total of about 16,000 serious crimes were reported in 2012. This is a significant drop from the approximately 21,000 reported in 2008. The Table further reveals defilement as the most common serious crime accounting for more than half of all the serious crimes in 2012. Over all, there has been a gradual reduction in the number of serious crimes over the years from 2008 to 2012. See details in Statistical Appendix table 2.6 B.

Table 2.6.1: Serious Crimes Reported by Type, 2008- 2012

Type of Serious Crimes	2008	2009	2010	2011	2012
Defilement	8,635	7,360	7,564	7,690	8,076
Burglary	6,825	5,309	5,535	4,203	3,867
Homicides	2,753	2,669	1,761	1,987	1,910
Aggravated Robbery	1,281	1,859	383	1,013	1,068
Rape	1,536	619	709	520	530
Child stealing	157	206	215	123	97
Child Trafficking	-	-	-	38	22
Total	21,187	18,022	16,167	15,574	15,572

Note: "-" refers to missing data

Source: Uganda Police Force

2.6.3 Prisoners

The Uganda Prisons Service compiles data on number of prisoners and categorizes them into two, namely, convicted prisoners and those on remand. Table 2.6.2 shows a total of about 37,000 prisoners country wide, reflecting an increase of 6 percent from the number in 2011. The Table further indicates that more than half of the prison population was on remand. (Statistical Appendix Table 2.6.A)

Table 2.6.9 Causes of Road Accidents, 2010 - 2012

Causes of Accidents	2010		2011		2012	
	Number	percent	Number	percent	Number	percent
Careless Driving	9,316	41	8,659	39	8,694	41
Reckless/Dangerous Driving	6,579	29	6,514	29	5,831	28
Unknown cause (Hit & Run)	2,129	9	1,818	8	1,105	5

Total	22,461	100	22,272	100	21,106	100

Source: Uganda Police Force

2.6.7 Express Penalty Scheme

About 261,000 tickets were issued on the Express Penalty Scheme (EPS) in 2012. However, there was a 44 percent reduction in the amount of money that was realized from the express penalty scheme.

Table 2.6.10: Number of Tickets and amount paid on the express penalty scheme, 2008-2012

Year	Average tickets value (Shs)	Tickets issued	Amount paid (Mill. Shs)
2008	71,984	43,861	3,157.3
2009	47,329	102,643	4,857.0
2010	32,034	212,086	6,793.0
2011	52,371	238,387	12,484.6
2012	26,890	261,305	7,026.5

Source: Uganda Police Force

Although the number of tickets issued has been steadily increasing, the average value of tickets has been on the declining trend since 2008, save for 2011 when it increased.

CHAPTER THREE

3 PRODUCTION STATISTICS

3.1 Agriculture and Fisheries

This section presents statistics on food crop area and production, traditional cash crop production, livestock and livestock products, and fish catch.

The contribution of the agriculture sector to Gross Domestic Product (GDP) at current market prices stagnated over the years at about 22 percent. The sector continues to be the major source of employment. About 66 percent (UNHS 2009/10) of the country's working population is engaged in the agriculture sector and derive their livelihood over it. The sector is also a major source of raw materials to the local industries and contributed about 40 percent of the total goods export earnings in 2012.

3.1.1 Cash Crops

Some of the main traditional cash crops of Uganda include: Coffee, tea, cotton and tobacco. Coffee forms a major source of revenue for the country since it dominates the exports in terms of value.

Uganda produces two kinds of coffee that is; Robusta and Arabica coffee also known as Mountain coffee. Over the years, Robusta coffee has been procured in much more quantities compared to Arabica coffee. In 2012, Uganda procured a total of 186,126,000 tons of coffee of which 72 percent was Robusta. It should however, be noted that coffee quantities procured are used as a proxy to production.

Unlike in 2011 when the quantity of coffee procured increased by 14.6 percent, in 2012 there was a reduction by 2.7 percent. This was due to a reduction in Robusta coffee produced by 12 percent despite an increase (35 percent) in the amount of Arabica coffee produced. Statistical Appendix Table 3.1A gives production data on traditional cash crops for the period 2008-2012.

Figure 3.1.1: Coffee, Tea and Tobacco production in 2011 and 2012

Despite a decline of 28.4 percent in tea production between 2010 and 2011, there was a significant increase in tea production in 2012 by 44.7 percent.

The quantity of tobacco produced in 2012 registered an increase of 9.3 percent, almost doubling the increment of 4.8 percent observed in 2011.

3.1.2 Food Crops

Uganda Bureau of Statistics in collaboration with the Ministry of Agriculture, Animal Industry and Fisheries (MAAIF) conducted a Uganda Census of Agriculture (UCA) in the Second Season of 2008 and First Season of 2009. Consequently, statistics on crop area and production in 2012 were projected basing on the UCA 2008/09 results. Details are shown in Statistical Appendix Tables 3.1 C and 3.1 D.

The UCA 2008/09 results revealed that Uganda grows 17 major crops. These include: Cereals (Maize, Millet, Sorghum, Rice); Root crops (Cassava, Sweet potatoes, Irish potatoes); Pulses (Beans, Cow peas, Field peas, Pigeon peas); and Oil crops (Groundnuts, Soya beans, Simsim), Plantain Bananas (Food, Beer, Sweet types).

The total area planted in 2012 for the above crops was 5,729,000 Ha which was an increment of two (2) percent compared to 2011. Cereals occupied 30.2 percent of total area planted for major crops while Root crops occupied (23.7 percent), Pulses (13.3 percent), Plantains (16.8 percent) and Oil crops (16.0 percent). In addition, Maize with 62.6 percent, Cassava (64.0 percent), Beans (88.4 percent) and Groundnuts (46.6 percent) occupied the largest proportions of area planted within their broad crop categories. Although these percentages are not much different from those of 2011, there was a general increase (between 1 and 5 percent) in the area planted for all crops except plantains. (Statistical Appendix Table 3.1B)

Production estimates for 2012, indicate that Maize with 7.2 percent, Irish potatoes (three percent), Cassava (three percent), Sweet potatoes (3.5 percent), and Pigeon peas (2.1 percent) are the crops which registered increments in production while the rest of the crops recorded declines in production as compared to 2011. (Statistical Appendix Table 3.1 C).

3.1.2.1 Crop Area and Production by Region and District, UCA 2008/09

Results from the UCA 2008/09 show that the Eastern region was the biggest producer of Finger millet (106,838 tonnes), Maize (1,108,554 tonnes), Rice (128,195 tonnes), Sweet potatoes (847,140 tonnes) and Cassava (1,061,186 tonnes). The Northern region led in the production of Sorghum (177,088 tonnes), Field peas (10,428 tonnes), Pigeon peas (11,031 tonnes), Groundnuts (83,182 tonnes), Soya beans (15,727 tonnes) and Simsim (93,562 tonnes) while the Western region led in the production of all types of Banana (2,883,648 tonnes) and Beans (411,945 tonnes).

In terms of districts and within regions, the highest plantain Banana production in the country was reported in the district of Isingiro (601,363 tonnes). The districts with the highest production of plantain Banana in the Central, Eastern, Northern and Western regions were Mubende (204,109 tonnes), Mbale (99,011 tonnes), Arua (17,106 tonnes) and Isingiro (601,363 tonnes) respectively.

The highest Maize production in the country was reported in the district of Iganga with 303,262 tonnes. The districts with the highest production of Maize in the Central, Eastern, Northern and Western regions were Mubende (171,089 tonnes), Iganga (303,262 tonnes), Adjumani (47,264 tonnes) and Kabarole (91,318 tonnes) respectively.

The highest Sweet Potatoes production in the country was reported in the district of Iganga with 270,853 tonnes. The districts with the highest production of Sweet Potatoes in the Central, Eastern, Northern and Western regions were Nakasongola (66,419 tonnes), Iganga (270,853 tonnes), Gulu (61,732 tonnes) and Kyenjojo (40,148 tonnes) respectively.

The highest Cassava production in the country was reported in the district of Apac with 239,932 tonnes. The districts with the highest production of Cassava in the Central, Eastern, Northern and Western regions were Masaka (64,965 tonnes), Tororo (174,962 tonnes), Apac (239,932 tonnes) and Hoima (60,932 tonnes) respectively.

Ntungamo district with 137,899 Tonnes reported the highest Beans production in the country. The districts with the highest production of Beans in the Central, Eastern, Northern and Western regions were Mubende (78,027 tonnes), Mbale (23,637 tonnes), Amuru (74,671 tonnes) and Ntungamo (137,899 tonnes) respectively. The highest Groundnuts production in the country was reported in the district of Soroti with 19,599 tonnes. The districts with the highest production of Groundnuts in the Central, Eastern, Northern and Western regions were Nakasongola (19,183 tonnes), Soroti (19,599 tonnes), Amuru (14,375 tonnes) and Kibaale (12,473 tonnes). Details of crop production is presented in Statistical Appendix Table 3.1D.

Statistical Appendix Table 3.1 K presents the findings on some of the crops grown by the households. The findings showed that the highest proportion of households growing Coffee was in Bukomansimbi district (55.8 percent) while in Adjumani, Kumi, Ngora, Otuke and Moroto hardly any household grew Coffee.

Oyam had the highest proportion of households growing Beans and Cassava (84.8 percent and 75.6 percent respectively). Adjumani had the least proportion of household growing Beans (0.8 percent) while Moroto had the least that were growing Cassava (0.0 percent). Alebtong had the highest proportion of households growing Millet (37.8 percent) and Kalangala had none of the households growing millet.

Mitooma district had the highest proportion of households growing Bananas (89.0 percent) while Moroto and Napak district hardly had any households growing Bananas. Sweet Potatoes were mostly grown by households in Kabale (63.6 percent) and were not grown at all in Moroto (0.0 percent).

Maize was mostly grown by households in Kiryandongo (75.4 percent) while Sorghum was mostly grown by households in Napak (74.8 percent). Kalangala had the least proportion of household that grew Maize and sorghum estimated at 0.4 and 0.0 percent respectively. Irish Potato growing was mostly done by households in Kabale (33.0 percent) and districts such as Kalangala, Napak, Apac, Oyam and Moroto hardly had any household growing the crop. Rice growing was mostly done by households in Otuke (40.7 percent) while in districts like Kalangala, Moroto, Napak, Bukomansimbi, Masaka, Buhweju, Bushenyi, and Lwengo never had households growing rice.

3.1.3 Fish Catch by Water Body, 2009 – 2012

Fishing activities are mainly carried out in open water sources and provide an important source of livelihood for many people in Uganda. Open Water covers 15.3 percent of Uganda’s surface and comprises of five major lakes (Victoria, Albert, Kyoga, Edward and George), which are the main sources of fish in the country.

Lake Victoria continues to be the most important water body in Uganda both in size and contribution to the total fish catch. Its share of catch was 39.9 percent in 2010, 41.4 percent in 2011 and 45.7 percent in 2012. The catch share of Lake Victoria in 2012 was followed by Albert then Lake Kyoga as seen in figure 3.1.2 F. There was a decrease in fish catch from Lake Victoria in the year 2012 to 169.8 thousand tonnes from 185.5 thousand tonnes in 2011. Lakes: Albert, Kyoga, Edward, George and Kazinga Channel also recorded significant decline during the period under review. It is worth noting that over 90 percent of the fish catch is harvested from Lakes: Victoria, Albert, and Kyoga. The details of fish catch data by water body for the period 2009 to 2012 are shown in Statistical Appendix Table 3.1 F.

Overall, the decrease in fish catch could be attributed to: Inadequate capacity of Beach Management Units (BMUs) in fisheries management, resurgence of water hyacinth and the emergence of new weeds, lack of species-specific management plans, use of inappropriate fishing gears and Lack of clear understanding on the economics of fisheries development, among others.

Figure 3.1.2: Proportion of Fish Catch by Water Body, 2012

3.1.4 Livestock

Similar to the period 2010-2011, livestock/poultry numbers increased between 2011 and 2012 by about 3.2. These increments were attributed to the steady efforts to control animal diseases and improvement in the livestock production systems as a result of routine livestock extension interventions. Livestock numbers

increased between 2010 and 2012. Details of livestock and their products are presented in Figure 3.1.3 and in Statistical Appendix Tables 3.1 G to 3.1J.

Figure 3.1.3: Livestock Numbers ('000), 2010 – 2012

3.1.4.1 Production of Cattle and Poultry by breed in 2012

There were 11,797,000 indigenous cattle (93.1 percent) compared to 861,000 (6.7 percent) exotic ones. Regarding Poultry; indigenous were 39,644,000 (86 percent) while exotic were 6,257,000 constituting 14 percent as shown in Table 3.1.3.

Table 3.1.3: Number of Cattle and Poultry Numbers ('000) by breed, 2009-2012

Year	Cattle		Poultry	
	Indigenous	Exotic	Indigenous	Exotic
2009	10,963	788	33,820	4,737
2010	11,292	812	34,834	4,879
2011	11,631	836	35,879	5,026
2012	11,979	861	39,644	6,257

The indigenous livestock breeds continued to be dominant over the exotic ones in 2012 as shown in figure 3.1.4.

Figure 3.1.4: Cattle and Poultry Numbers by breed 2012

3.1.5 Production of Milk and Beef (2009-2012)

This sub-section presents data on beef, milk and eggs production based on the Livestock Census 2008. The production of milk in 2012 was estimated to be 1,461 million litres, which was an increment of 43 million litres, 3.0 percent from 2011. This was about the same percentage increase registered in 2011 as seen in Figure 3.1.5a below.

Figure 3.1.5a: Milk Production Trend 2009 – 2012

Beef production in 2012 was estimated to be 191,280 tonnes which was an increment of 5,571 tonnes or about 3.0 percent compared to 2011 as seen in Figure 3.1.5b.

Figure 3.1.5b: Beef Production (Mt), 2009-2012

Egg production in 2012 was estimated to be 27,057 tonnes compared to 26,269 tonnes that were produced in 2011 as seen in Table 3.2.5.

Table 3.1 4: Egg Production, 2009 -2012

Year	Egg Production (Nos)	Egg Production (tonnes)
2009	739,100	24,761
2010	761,273	25,504
2011	784,111	26,269
2012	807,634	27,057

3.2 Industry

3.2.1 Index of Production (Manufacturing)

The Manufacturing index increased by 4.5 percent in 2012 when compared to the 2011 level. This was largely due to an increase in production in Food Processing (9.4 percent) and Drinks & Tobacco (6.4 percent). (Statistical Appendix 3.2A)

Figure 3.2.1: Index of Production (Manufacturing), 2008- 2012

Table 3.2.1: Index of Production by Item, 2008- 2012 (2002 = 100)

	Wt	2008	2009	2010	2011	2012
Processed Foods	400	139	161	153	143	157

3.3 Energy

3.3.1 Introduction

This section presents statistics on energy sources available in Uganda. The energy sources mainly include imported petroleum products and locally generated electricity (hydro and thermal) in the country.

3.3.2 Imports of Petroleum Products

Petroleum products include mainly Premium Motor Spirit (PMS), Automotive Gas Oil (AGO), Diesel, Bulk Illuminating Kerosene (BIK), Aviation Fuel and Liquefied Petroleum Gas (LPG). Other products include Lubricants and Bitumen that are imported into the country. Figure 3.3.1 below shows that the volumes of PMS imports increased by 4 percent between 2011 and 2012. However AGO import volumes showed a significant decrease of 14 percent in 2012 compared to 2011.

Figure 3.3.1 Imports of Petroleum Products, 2008 to 2012 (Cubic Meters)

3.3.3 Sales of Petroleum Products

Among the products sold on the market, PMS and LPG registered an increase of 21 percent and 18 percent respectively in 2012 compared to the sales in 2011. However, Diesel and Kerosene sales reduced by 8 and 17 percent respectively as shown in Figure 3.3.2 below. Further analysis shows that between 2008 and 2012, sales of petroleum products increased by 41 percent.

Figure 3.3.2 Sales of Selected Petroleum Products, 2008 to 2012 (Cubic Meters)

3.3.4 Annual Average Prices for Selected Petroleum Products

Table 3.4.1 shows the average annual price changes for petroleum products. The findings show that between 2008 and 2012, the prices for both selected products increased significantly by 36 and 26 percent for Petrol and paraffin respectively. However, since 2010 the general prices for these have also been increasing as shown in Figure 3.3.3.

Table: 3.3.1 Average Retail Prices Per Litre of Selected Petroleum Products 2008 – 2012, Ug. Shs

Product	2008	2009	2010	2011	2012	Changes 5 year period
Petrol	2,686	2,485	2,870	3,609	3,655	
Percent Annual Changes		-7.5%	15.5%	25.7%	1.3%	36.1%

Annual percentage change		-15.9%	5.1%	38.5%	2.7%	25.7%

Source: Ministry of Energy and Mineral Development

Figure: 3.3.3 Average Annual Price Changes Between 2008 to 2012, UGX

3.3.5 Electricity

3.3.5.1 Electricity generation

Uganda generates electricity from hydroelectric power stations located at Nalubaale and Kiira Power Stations (formally Owen falls dam) in Jinja. In addition, there are thermal, mini and micro-hydro power stations scattered in the country which either contributes to the national power grid or directly serve specific communities and individuals.

The predominant source of electricity in Uganda is hydro electric power. In addition, electricity is also supplied to the main grid by the thermal generators and some from Bagasse plants. However, there are other mini electricity plants that do not feed into the main grid but supply power to the surrounding areas. These include Kisiizi Hospital, Kihhihi generation plant for thermal power, and the West Nile Rural Electrification Company (WENRECO) among others. In addition, Uganda also imports some electric power from Rwanda as a cost effective measure to serve Kisoro town which is nearer the grid from Rwanda than to the one in Uganda. Some of the generated power is exported to neighboring Kenya, Tanzania and Rwanda.

3.3.5.2 Electricity Purchases

The total units of electricity purchased increased by 2 percent from 2,891.43 GWh in 2011 to 2,944.17 GWh in 2012 as shown in Figure 3.4.3 below. However, between 2008 and 2012, the total increase in purchases was 35 percent. The increase in power purchase followed the commissioning of Bujagali Hydro Electric power plant in 2012 that generated more 966.13 MW.

Figure 3.4.4 Total Units Purchased (GWH) by Uganda Electricity Transmission Company, 2008-2012.

3.4 Building and Construction

3.4.1 Building Statistics

Building statistics is an indicator of the stock of housing in the country. Data is collected on Building Plans Submitted, Plans Approved and Occupational Permits Issued from 25 Municipalities and 56 Town Councils across the country. The data collected covers Residential, Commercial, Industrial and Institutional buildings, as well as other structures. Institutional buildings include schools, hospitals and office buildings while other structures include mosques, churches and those not elsewhere categorised.

3.4.1.1 Plans Submitted

Statistical Appendix Table 3.4 A shows that over the period, the total number of Plans Submitted progressively increased from 1,458 Plans in 2008 to 4,432 Plans in 2012. The highest increase in number of Plans Submitted was 71.7 percent recorded in 2011, at 3,282 Plans from 1,912 Plans in 2010. This was mainly due to an increase in Residential and Commercial Plans Submitted. Residential Plans increased from 1,075 Plans in 2010 to 1,954 Plans in 2011 while Commercial Plans increased from 657 Plans in 2010 to 1,128 Plans in 2011. Although Industrial buildings and other structures generally increased over the period, its increase was insignificant or at a slow pace. Figure 3.4.1 below presents the changes in numbers of Plans Submitted in each category over the period.

Figure 3.4.1 Plans Submitted, 2008 – 2012

3.4.1.2 Plans Approved

The total number of Plans Approved progressively increased from 299 in 2008 to 2,566 Plans in 2012. The highest increase in number of Plans Approved was recorded in 2009, at 861 Plans from 299 Plans in 2008. This was mainly due to an increase in Residential Plans Approved from 179 to 432 Plans and Commercial Plans Approved from 91 to 349 Plans. (Statistical Appendix Table 3.4.B)

Figure 3.5.2 below, presents the changes in numbers of Plans Approved in each category over the period.

Figure 3.4.2 Plans Approved, 2008 – 2012

3.4.1.3 Occupational Permits Issued

Occupational permits are documents issued to individuals/businesses/organisations by a municipality or town council certifying that a given building has been duly completed according to the standard requirements and fit for use or to be occupied. As shown in Appendix Table 3.4 C below, the number of Occupational Permits Issued increased by 62 percent in 2009 compared to 2008, mainly due to increase in Industrial and Institutional Occupational Permits Issued. Over the period 2010 and 2011, there was a decline in the total number of Occupational Permits Issued by 17 percent and 1.2 percent, respectively. This was due to a decline in Occupational Permits Issued across all categories of structures. In 2012, the number of Occupational Permits Issued increased greatly from 84 Permits in 2011 to 248 Permits in 2012.

Figure 3.4.3 below, presents the changes in numbers of Occupational Permits Issued in each category over the period.

Figure 3.4.3 Occupational Permits Issued, 2008 - 2012

3.4.2 Cement Consumption

This section presents data on Production, Imports, Exports and Net Domestic Supply of Cement in the economy for the period 2008 to 2012. Total Net Domestic Supply of Cement registered the highest increase of 16.1 percent in 2009 from 1,152 thousand tonnes in 2008 to 1,338 thousand tonnes in 2009. This was followed by 11.8 percent in 2011 and 11.3 percent in 2010. The lowest increase of Net Domestic Supply of Cement was registered in 2012, at 2.2 percent from 1,665 thousand tonnes in 2011 to 1,701 thousand tonnes in 2012 as shown in Table 3.4.1 below. Imports remained fairly stable between 2010 and 2011 (-0.4 percent), they greatly reduced between 2011 and 2012 (-10.4 percent). However, production greatly increased by 6.8 percent in 2012, hence a low overall increase of 2.2 percent in Net Domestic Supply (NDS) in 2012.

Table 3.4.1: Imports, Production, Exports and Net Domestic Supply of Cement ('000 Tonnes)

	2008	2009	2010	2011	2012
Production	1,193	1,162	1,347	1,666	1,780
Imports	310	566	503	501	449
Exports	351	390	362	502	528
Net Domestic Supply (NDS)	1,152	1,338	1,489	1,665	1,701
Annual % Change in NDS		16.14	11.29	11.83	2.17

Source: Uganda Bureau of Statistics

3.5 Mineral Statistics

This section presents statistics on mineral production, exports and imports. The three categories of Mineral statistics covered include: Energy minerals, Metallic minerals and Non metallic minerals.

3.5.1 Mineral production

Table 3.5.1 below shows the performance of mineral production from 2008 - 2012. The results show that the total value of mineral production increased from 87 billion in 2008 to 208 billion shillings in 2012. The total value of Mineral production increased by over 138 percent over the entire period. However, an annual comparison between year 2011 and 2012 shows that the value of production increased by three percent compared to 48 percent between 2010 and 2011.

Further analysis indicates that in 2012 the highest value of all minerals produced was Limestone with approximately 112 billion followed by Cobalt with 44 billion. On the other hand, Gold recorded the least mineral value produced, with only 508 thousand in 2012 as shown in Statistical Appendix Table 3.5A.

3.5.2 Mineral Imports

Table 3.5.1 below shows that mineral imports increased from UGX 17.4 billion in 2011 to 31.6bn in 2012, representing 82 percent increase in mineral import over the period. This increase was largely due to the increase in Gold importation over the same period as shown in Statistical Appendix Table 3.5C.

3.5.3 Mineral Exports

Mineral exports registered an increase of seven percent in the total value, from UGX65.2 billion in 2011 to nearly 70.0 billion in 2012 as shown in Table 3.5.1 below and Statistical Appendix Table 3.5 D. Further analysis indicates that Gold and Cobalt registered the highest mineral exports value in 2012 accounting for 35 billion and 31 billion respectively.

Table 3.5.1 Summary of Mineral Statistics by Value (Million Shs), 2008-2012,

	2008	2009	2010	2011	2012
Production	87,349	98	126,190	177,655	207,819
Exports	89,247	27,622	36,486	65,247	69,896
Imports	102,436	27,119	40,843	17,361	31,557

Source: Ministry of Energy and Mineral Development

3.6 Transport

This section deals with transport statistics which include road, rail and air services.

3.6.1 National Roads Network

The Uganda road network is categorized into two categories namely; national roads and district roads. National roads are roads connecting districts and are managed by the Uganda National Roads Authority (UNRA), while district roads are roads within districts and are managed by the local governments.

Road transport has over the year's registered tremendous growth as illustrated by the number of kilometers of both paved and unpaved roads. For the period 2011 to 2012 there was a notable increase in the length of paved roads from 3,264 in 2011 to 3,317 in 2012 kilometres representing a two percent increase, while unpaved roads increased from 16,736 kilometers in 2011 to 17,683 km in 2012, representing six percent increase. National roads network increased from 20,000kms in 2011 to 21,000kms in 2012 representing a five percent increase and this was a result of government taking over roads from the districts.

Table 3.6.1 National Road Network in Uganda, km

	2008	2009	2010	2011	2012
Total Paved	2,968	2,989	3,112	3,264	3,317
Annual Change percent paved		0.7%	4.1%	4.9%	1.6%
Total unpaved	7,532	17,011	16,888	16,736	17,683
Annual Change percent unpaved		125.8%	-0.7%	-0.9%	5.7%
Total National Network	10,500	20,000	20,000	20,000	21,000

Source: Uganda National Roads Authority

3.6.1.1 Newly Registered Motor Vehicles

Although the road transport sector has over the years recorded tremendous growth in the number of newly registered vehicles from 2009 to 2011, it reduced in 2012 by 23 percent as indicated in Table 3.6.2 below.

Table 3.6.2 Newly Registered Motor Vehicles, 2008-2012

Category	2008	2009	2010	2011	2012
Newly Registered	105,595	104,384	106,224	125,518	96,598
Percentage annual Change		-1.15	1.76	18.16	-23.04

Source: Uganda Revenue Authority

3.6.2 Air Transport

This section presents data on the movement of commercial aircrafts, passengers and Cargo through Entebbe International airport. Figure 3.6.1 below shows that Commercial aircraft movement and over flights at Entebbe International Airport increased by 24 and 16 percent in 2011 and 2012 respectively.

Figure 3.6.1 Commercial and Over flights at Entebbe International Airport, 2008 - 2012

3.6.2.1 Passenger Air Transport

Table 3.6.3 below indicates that, the total number of passengers passing through Entebbe International Airport increased from 1,166,996 in 2011 to 1,342,112 in 2012, representing a 15 percent increase for both domestic and International travels. However, the number of domestic passengers that went through Entebbe airport in 2012 increased by 45 percent while the number of international passengers increased by 15 percent during the same period. Between 2008 and 2012, the total number of passengers increased by 34 percent.

Table 3.6.3 Number of Passengers through Entebbe International Airport, 2008 - 2012

Category	2008	2009	2010	2011	2012
International	974,865	978,486	1,098,997	1,157,488	1,328,332
Annual Change (%) International		0.4%	12.3%	5.3%	14.8%
Domestic	23,072	17,909	11,879	9,508	13,780
Annual Change (%) domestic		-22.4%	-33.7%	-20.0%	44.9%
Total	997,937	996,395	1,110,876	1,166,996	1,342,112
Total Passenger Annual change		-0.2%	11.5%	5.1%	15.0%

3.6.2.2 Volume of Cargo through Entebbe International Airport

Figure 3.6.2 below shows the trend of cargo (imports Unloaded and exports-loaded) cleared through Entebbe International Airport. Exports and Imports of goods through the airport increased by 21 percent and Seven percent respectively in 2012. (Statistical Appendix Table 3.6B)

Figure 3.6.2 Volume of Cargo through Entebbe International Airport (Tonnes)

3.7 Communication Statistics

3.7.1 Telephone usage

The year 2012 registered a 2.9 percent decline in overall subscriptions from 17,161,841 in 2011 to 16,671,343 subscribers in 2012. The fixed and cellular segments registered a decline of 32.2 percent and 2.0 percent respectively in 2012. This was due to the introduction of the SIM-card registration exercise coupled with weeding-out of inactive SIM-cards by service providers. Subsequently, national telephone penetration declined to 48.8 lines per 100 people in 2012 from 52.1 in 2011.

The volume of talk time traffic increased by 7.4 percent from 13,028 million minutes in 2011 to 13,997 million minutes in 2012 as shown in Table 3.7.1. On-net traffic grew by 11.8 percent from 10,285 million minutes in 2011 to 11,494 million minutes in 2012. On the other hand, the off-net segment and outgoing international traffic declined by 7.1 percent and 15.5 percent respectively in 2012. The growth in overall traffic was a result of discounted on-net promotional offers and international rate revisions coupled with competitive retail tariffs.

Table 3.7.1: Telephone Subscribers and Talk Time, 2008-2012

Service	2008	2009	2010	2011	2012
Subscribers	8,723,345	9,617,267	13,155,378	17,161,841	16,671,343
Fixed Telephone	168,481	233,533	327,114	464,849	314,956
Cellular Phone	8,554,864	9,383,734	12,828,264	16,696,992	16,356,387
Teledensity (lines per 100 population)	29.5	31.4	41.4	52.1	48.8
Talk time (traffic, million minutes)	4,269	7,147	10,038	13,028	13,997
of which off-net	na	na	1,392	2,531	2,352
on-net	na	na	8,515	10,285	11,494
International	135	121	130	213	246

Source: Uganda Communications Commission

3.7.2 Call tariffs

The average on-net domestic call rate rose to an average of 216 shillings per minute from 192 shillings at the end of 2011. The off-net average call rate also rose to 264 shillings per minute (Table 3.7.2).

Table 3.7.2: Call Tariff Averages, 2008-2012

Call tariff averages per minute	Jun-08	Dec-09	Dec-10	Dec-11	Jun-12	Dec-12
On-net	334	318	180	192	216	216
Off-net	395	384	180	252	264	264

Source: Uganda Communications Commission

3.7.3 Internet Market

Overall, the number of internet subscribers more than doubled in 2012. This was largely due to the significant increase in mobile internet subscription. Fixed internet subscription grew by only 8 percent. The continuous upgrade and expansion of networks by service providers with advanced 3G and 4G technologies allowing for faster broadband connection speeds led to the growth in this market. The percentage of the population subscribed to the internet rose from 3.2 percent to 8.2 percent in 2012 as more internet devices entered the market and service providers continued to invest more in their infrastructure.

Table 3.7.3 Internet Subscribers, 2008 – 2012

Users and Subscribers	2008	2009	2010	2011	2012
Fixed Internet Subscribers	22,000	30,000	35,000	88,786	96,000
Mobile Wireless Internet Subscriptions	214,293	310,058	541,000	977,500	2,692,705
Estimated internet users (000)	2,500	3000	4000	4800	6200
Internet Penetration	0.8	1.1	1.8	3.2	8.2

Source: Uganda Communications Commission

3.7.4 Mobile Money Transactions

The number of mobile money transfer subscriptions increased to 5.7 million by June 2012 from 2.8 million in 2011. This accounts for 36.5 percent of total mobile subscribers. This growth was a result of mobile money service promotions carried out during the SIM-card registration exercise as well as continued demand for convenient, affordable and time saving means of payment. The value of transactions increased by 30.6 percent as a result of increased number of subscriptions, increased coverage, upgrading of network and introduction of new service portfolios.

Table 3.7.4 Mobile Money Transactions, 2009 – 2012

Subscribers	Dec-09	Dec-10	Dec-11	Jun-12
Mobile money registered customers	550,047	3,683,723	2,829,968	5,662,871
Transactions (number '000)	2,840	28,820	87,500	94,500
Transactions (value bn. Shs)	132.6	962.7	3,753	4,901

Source: Uganda Communications Commission

3.7.5 Postal and Courier services

The volume of letters handled by Posta Uganda decreased by 30 percent from 3.7 million in 2011 to 2.6 million in 2012. Parcels received from abroad increased by 6 percent from 18,800 in 2011 to 19,841 in 2012. EMS items posted and received increased by 36 percent and 11 percent respectively in 2012. (Statistical Appendix Table 3.7 B).

3.7.6 Migration and Tourism

This section presents a summary of migration statistics (movement of persons through gazetted points of entry and exit) and tourism statistics (visitors to national parks in the country).

3.7.6.1 International Arrivals and Departures

The information presented here is based on travels through the 32 gazetted border points. The numbers of arrivals and departures have been growing steadily since 2008, except in 2009 when a slight decline was noted. The country recorded a total of 1.6 million arrivals and 1.5 million departures in 2012. The arrivals through official border posts increased by 6.8 percent in 2012, while departures increased by 7.3 percent in the same period as shown in table 3.7.1. The net movement in 2012 was 162,000 persons.

Table 3.7.1: Arrivals and Departures ('000s), 2008 – 2012

Period	Arrivals		Departures		Net Movement*
	Number	%age Change	Number	%age Change	
2008	1,163	31.7	1,143	30	20
2009	1,095	-5.8	1,072	-6.2	24
2010	1,275	16.4	1,183	10.4	91
2011	1,530	20	1,371	15.9	159
2012	1,634	6.8	1,471	7.3	162

3.7.6.2 Arrivals and Departures by Residence for EAC Region ('000), 2008 – 2012

The EAC Common Market Protocol guarantees free movement of persons who are citizens of Partner States within the EAC territory. The number of arrivals from EAC member states increased from 515,000 in 2008 to 770,000 in 2012. The majority of the arrivals came from Kenya and Rwanda. Similarly the departures increased from 523,000 to 690,000 and destined mostly to the above countries, although at lower rate than the arrivals. The net movement within the region increased from -8,000 persons in 2008 to 80,000 in 2012.

Table 3.7.2: Arrivals and Departures by Residence for EAC Region ('000s), 2008 – 2012

Direction of movement by Country of Residence	2008	2009	2010	2011	2012
Arrivals					
Burundi	38	43	37	44	40
Kenya	250	264	294	344	393
Rwanda	181	204	177	266	256

*Net movement = Arrivals less departures

3.7.7 Tourist Arrivals

A tourist is any person travelling to and staying in places outside their usual residence (environment) for a period not more than twelve consecutive months for leisure, business and other purposes not related to the exercise of an activity remunerated from within the place visited. In this context, non-resident arrivals are referred to as tourist arrivals. Table 3.7.3 shows that out of 1.6 million total arrivals in 2012, 1.2 million (73 percent) were tourists. The number of tourist arrivals increased from 844,000 to 1.2 million in 2012. During the period (2008-2012) the non resident arrivals were consistently higher than the departures, indicating a net growth in the migrating population.

Table 3.7.3: Arrivals and Departures by Residence, 2008 – 2012

Year	Arrivals ('000s)			Departures ('000s)			Net Movement ('000) Non resident
	Resident	Non Resident	Total	Resident	Non Resident	Total	
2008	320	844	1,163	337	806	1,143	38
2009	288	807	1,095	311	761	1,072	48
2010	329	946	1,275	324	860	1,183	86

3.7.7.1 Tourist Arrivals by Purpose of Visit

Table 3.7.4 shows that, the majority of tourists arrivals came into the country to visit friends and relatives followed by those for business and professional, conferencing and then leisure, recreation and holidays. The category 'others' includes travelers in transit, those engaged in temporary employment and short-term contract/consultancy, etc.

The number of non resident arrivals that came into the country for leisure, recreation and holidays increased from 144,000 to 148,000 representing 3 percent increase between 2008 and 2012, despite the reductions in 2009 and 2011.

Table 3.7.4: Tourist Arrivals by purpose of visit ('000s), 2008 - 2012

Purpose	2008	2009	2010	2011	2012
Leisure, recreation and holidays	144	126	149	76	148
Business and professional conferences	163	167	184	160	205
Visiting friends and relatives	347	406	357	603	383
Others	190	107	256	312	461
Total	844	806	946	1,151	1,197

Source: Ministry of Internal Affairs and Uganda Bureau of Statistics

3.7.7.2 Non Resident Arrivals by mode of travel

Majority of the non resident arrivals used road transport as a mode of travel. The number of non resident arrivals by road increased from 486,000 to 781,000 between 2008 and 2012 as shown in Figure 3.8.1 below.

Entebbe Airport accounts for all non resident arrivals that used air as a mode of travel. Between 2008 and 2009 the number of arrivals by air transport declined from 358,000 to 271,000 and thereafter increased to 416,000 persons in 2012. There were no records for travellers through the railway means of transport.

Figure 3.8.1: Non Resident Arrivals by Mode of Transport ('000), 2008 – 2012

3.7.7.3 Age-Sex Composition of Tourist Arrivals

The males have consistently dominated the tourist arrivals. They constituted over 70 percent of the tourist arrivals over the past five years (2008 - 2012). The majority (54 percent) of the tourist arrivals were in the age group 20-39 years followed by the age group between 40-59 years. Tourists aged less than 20 and above 60 years accounted for about 4 percent of the total tourist arrivals in 2012. (Statistical Appendix Table 3.8 N)

3.7.7.4 Visitor Arrivals by Place of Origin

In 2012, most visitor arrivals in the country were from the African continent, followed by Europe and America. Tourists from the neighboring countries (Kenya, Rwanda, Tanzania, the South Sudan and D.R. Congo) accounted for 78 percent of all visitor arrivals. This was followed by the United States and United Kingdom accounting for 5 percent and 3.6 percent of non resident arrivals respectively. (Statistical Appendix Table 3.8 M)

3.7.7.5 Visitors to National Parks

Uganda has twelve national parks and three active game reserves. These offer a wide range of tourism products including gorilla tracking, nature guided walks, village walks, butterfly and bird watching, rare fauna and flora species. Figure 3.8.2 shows that the number of visitors to the national parks increased from 138,000 to 210,000 between 2008 and 2011 representing 52 percent increase, however, a 13 percent decline was observed in 2012.

Figure 3.8.2: Visitors to National Parks ('000), 2008-2012

The most commonly visited national park in 2012 was Murchison falls (33 percent) followed by Queen Elizabeth (32 percent) and then Lake Mburo (13 percent) national parks. The three collectively account for more than three quarters of the visitors to National Parks. There was a 33 percent increase in the number of visitors to the national parks between 2008 and 2012. (Statistical Appendix Table 3.8 O)

Figure 3.8.3 shows that the annual number of visitors to the national parks in 2012 by category. The highest percentage (45 percent) of visitors to national parks was non-residents of foreign origin followed by residents from East African Countries (24 percent) and Ugandan students (21 percent).

Figure 3.8.3: Visitors (Citizens and foreigners) to National Parks (Percentage), 2012

Map of Uganda Showing Numbers of Arrivals and Departures for 2012

CHAPTER FOUR

4 MACROECONOMIC STATISTICS

4.1 National Accounts

4.1.1 Gross Domestic Product

The Gross Domestic Product (GDP) estimates provided are compiled following the system of National Accounts Manual 1993/2008 using data from surveys, censuses and administrative sources. The GDP estimates at 2002 market prices for the Fiscal Year 2012/13 grew by 5.1 percent compared to a revised growth rate of 3.4 percent in 2011/12. For the Calendar Year 2012, the GDP grew by 2.8 percent compared to 6.2 percent in 2011. The major drivers for the stronger growth in the Financial Year 2012/13 were Construction, Manufacturing, Transport and communications and Real estate activities. In addition, GDP at basic prices grew by 4.8 percent in 2012/13 compared to 3.3 percent registered in 2011/12. Details on the performance of the overall economy and sectors/activities are presented below and in the Statistical Appendix Tables 4.1 A to 4.1 L.

Table 4.1.1: GDP percentage changes at Constant 2002 Prices, 2008/09 - 2012/13

Year	2008/09	2009/10	2010/11	2011/12	2012/13
GDP at Market Prices	7.3	5.9	6.6	3.4	5.1
GDP at basic prices	6.7	6.0	6.5	3.3	4.8

Source: Uganda Bureau of Statistics

Figure 4.1.1: GDP at Constant 2002 Market Prices and Growth Rates (Percent), 2008/09 - 2012/13

Figure 4.1.2: GDP at Current market prices, 2008/09 - 2012/13

4.1.2 Sector Performance

Growth was registered in all sectors of the economy in 2012/13. Agriculture, forestry and fishing grew by 1.4 percent, Industry by 6.8 percent and Services by 4.8 percent.

4.1.3 Production approach series

4.1.3.1 Agriculture, forestry and fishing Sector

Value Added from the agricultural activities such as cash crops, food crops, livestock, forestry and fishing activities grew by 1.4 percent in 2012/13, compared to a revised growth rate of 0.8 percent recorded in 2011/12 Fiscal Year. Agriculture sector contributed 23.2 percent to total GDP at current prices, in the Fiscal Year 2012/13.

4.1.3.1.1 Cash crops

Cash crops coverage includes the activities of growing coffee, cotton, tea, cocoa, tobacco, sugarcane, and horticulture. The value added from these activities increased by 3.9 percent in 2012/13 compared to a stronger increase of 8.2 percent in 2011/12. The change was mainly driven by a 13.9 percent increase in Tea, 9.8 percent in Coffee, 1.7 percent in Tobacco, 22.4 percent in Sugar cane and 6.8 percent in horticulture grew. A decline of 38.0 percent was however recorded in Cotton growing activities due to the fall in prices of cotton, forcing farmers to shift to other crops. Cocoa also registered a decline of 2.8 percent in 2012/13 compared to 2011/12 levels. The cash crop subsector contributed 1.7 percent to total GDP at current prices, in Fiscal Year 2012/13.

4.1.3.1.2 Food crops

The food crops Value Added grew marginally by 0.2 percent in 2012/13 compared to a decline of 1.7 percent recorded in 2011/12. Specifically, Maize production increased by 3.6 percent, Irish potatoes by 2.9 percent and Cassava by 3.6 percent. There was, however, a reduced growth in the output of Bananas, Finger Millet, Sorghum and Groundnuts of 1.1 percent, 4.0 percent, 3.3 percent and 3.1 percent respectively. The marginal growth in the food crop category was due to relatively favourable climatic conditions, particularly the long rains recorded throughout the country in 2012/13, although in the case of Bananas, the bacterial wilt affected production. The food crop subsector contributed 12.3 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.1.3 Livestock

Value Added for livestock grew by 2.8 percent in 2012/13. A similar growth rate was registered in 2011/12. The livestock subsector contributed 1.9 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.1.4 Forestry and Fishing

The Value Added for the Forestry subsector grew by 2.8 percent in 2012/13 compared to 3.3 percent recorded in 2011/12. Likewise, value added for the fishing subsector grew by 1.9 percent compared to a similar growth of 1.9 percent in 2011/12. The forestry and fishing subsectors contributed 4.6 and 2.8 percent respectively to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.2 Industry Sector

The Industry sector grew by 6.8 percent in the year 2012/13 compared to a growth of 2.5 percent during 2011/12. The strong growth in the Industry sector was mainly due to strong growth of the Manufacturing and Construction subsectors. Total manufacturing (formal and informal) grew by 4.2 percent in 2012/13 compared to a decline of 0.3 percent in 2011/12, while construction grew by 8.2 percent in 2012/13 compared to 3.2 percent in 2011/12. The industry sector contributed 26.6 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.3 Mining and quarrying

The performance of this sector is measured by the Index of Production – Manufacturing for the sub-group of Bricks, Tiles and Other Ceramic Production, Cement and Lime Production, and Concrete Articles Manufacturing. Value added from Mining and quarrying activities declined by 1.0 percent in the Fiscal Year 2012/13 compared to a 5.7 percent growth in 2011/12. The decline in Mining and quarrying was due to a decline in limestone and pozzolana activities. However there was a strong growth in vermiculite activities

during the same period. The Mining and quarrying subsector contributed 0.3 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.3.1 Manufacturing

The Value Added for Manufacturing in 2012/13 grew by 4.2 percent compared to a decline of 0.3 percent in 2011/12. Formal Manufacturing increased by 4.7 percent in 2012/13 compared to a decline of 2.2 percent in 2011/12. Informal Manufacturing registered a weaker growth of 2.5 percent in 2012/13 compared to a 5.9 growth in 2011/12. The manufacturing activities contributed 8.0 percent to total GDP at current prices in the Fiscal Year 2012/13.

The growth in **Formal** Manufacturing was mainly due to growth in the Food processing, beverages and tobacco category which grew by 10.7 percent in 2012/13 compared to a decline of 2.0 percent in 2011/12. There was a further decline in the 'Other manufacturing' category by 3.7 percent in 2012/13 compared to a decline of 2.8 percent in 2011/12. The "Formal" Manufacturing activities contributed 6.1 percent to total GDP at current prices in the Fiscal Year 2012/13.

The growth in **Informal** Manufacturing activities was attributed to an increase in fish processing, maize milling, miscellaneous food and furniture. The "Informal" Manufacturing subsector contributed 2.0 percent to total GDP at current prices in fiscal year 2012/13.

4.1.3.3.2 Electricity Supply

Electricity supply activities increased by 10.0 percent in 2012/13 compared to a growth of 7.4 percent in 2011/12. In the same period, electricity supply was more stable due to commencement of power supply from Bujagali Hydro Power Plant in the second half of 2011/12. The electricity supply activities contributed 1.3 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.3.3 Water Supply

Water supply activities grew by 4.2 percent in 2012/13 compared to a growth of 4.1 percent in 2011/12. The growth was mainly due to increased water supply activities in urban areas. Water supply activities contributed 3.3 percent to total GDP at current prices in Fiscal Year 2012/13.

4.1.3.3.4 Construction

Construction activities, which cover both the public and private sectors, grew by 8.2 percent in 2012/13 compared to 3.2 percent growth in 2011/12. The strong growth in construction activities was due to an increase in the Roads, bridges and non-residential buildings construction in the public construction activities (29.8 percent) in 2012/13. Construction activities contributed 13.7 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4 Services Sector

Value added from the services sector activities grew by 4.8 percent in 2012/13 compared to a growth of 3.6 percent in 2011/12. All categories of the service sector registered an increase in growth except health that registered a decline of 3.8 percent in 2012/13 compared to a decline of 0.4 percent in 2011/12. The services sector contributed 44.7 percent to the total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4.1 Wholesale and Retail Trade; Repairs

Value added from the Wholesale and retail trade; repairs activities grew by 1.7 percent in 2012/13 compared to 3.4 percent growth in 2011/12. The slow growth was due to a reduction in final consumption expenditure by households (which declined by 1.4 percent in 2012/13 compared to 6.1 percent growth in 2011/12) and government (which declined by 0.6 percent in 2012/13 in addition to a decline of 15.4 percent in 2011/12). Wholesale, retail trade and repairs contributed 12.4 percent to total GDP at current prices in FYear 2012/13.

4.1.3.4.2 Hotels and Restaurants

The Hotels and restaurants activities grew by 4.6 percent in 2012/13 compared to a growth of 18.0 percent in 2011/12. The slow growth in value added for Hotels and restaurants was mainly due to the slow growth in Non-resident arrivals to Uganda. Hotels and restaurant activities contributed 5.5 percent to total GDP at current prices in fiscal year 2012/13.

4.1.3.4.3 Transport and communications

Transport and communications activities grew by 10.4 percent in 2012/13 compared to 11.7 percent in 2011/12. Transport and communication sub-sector contributed 5.1 percent to total GDP at current prices in the Fiscal Year 2012/13.

The Road, rail and water transport sub-sector value added grew by 2.5 percent in 2012/13 compared to similar growth of 2.5 percent in 2011/12. Roads, rail and water transport contributed 2.5 percent to total GDP at current prices in the Fiscal Year 2012/13.

The Value Added for Air Transport Handling Activities grew by 7.8 percent in 2012/13 compared to 12.0 percent growth in 2011/12. This slow growth was due to slow growth in the non-residential arrivals. Air transport activities contributed 0.7 percent to total GDP at current prices in fiscal year 2012/13.

Posts and Telecommunications sub-sector activities registered a growth of 14.8 percent in 2012/13 compared to 18.9 percent growth in 2011/12. Telecommunications activities grew by 11.0 percent in 2012/13 compared to 19.2 percent in 2011/12 and posts and courier services grew by 10.6 percent in same time period. Posts and telecommunications activities contributed 1.9 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4.4 Financial Services

This sector is comprised of Commercial Banking, Central Bank, Insurance, Foreign Exchange Bureaus and other Activities Auxiliary to Financial Intermediation. The Financial services activities grew by 4.5 percent in 2012/13 compared to a decline of 10.0 percent in 2011/12. Financial services sub-sector contributed 3.8 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4.5 Community services

These services include Public administration, Education and Health. In this sub-sector, Public administration output grew by 3.8 percent in 2012/13 compared to a 15.2 percent decline in 2011/12. Public administration contributed 2.9 percent to the total GDP at current prices in the Fiscal Year 2012/13.

Education activities grew by 2.3 percent in 2012/13 compared to a decline of 4.2 percent in 2011/12. Education contributed 4.2 percent to total GDP at current prices in the Fiscal Year 2012/13.

The Health sector declined further by 3.8 percent in 2012/13 compared to a 0.4 percent decline recorded in 2011/12. Health contributed 0.8 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4.6 Other Personal and Community Services

The personal and community services sector includes theatres, cinemas, dry cleaning, houseboys and girls, barbers and beauty shops. This sector grew by 8.4 percent in 2012/13 compared to 13.8 percent growth in 2012/13. Other personal and community services sub-sector contributed 2.7 percent to total GDP at current prices in 2012/13.

4.1.3.4.7 FISIM

Financial Intermediation Services Indirectly Measured (FISIM) is the difference between interest income received and interest paid by the Commercial Banks and, therefore, portrays the performance of the net interest income of the Commercial Banks. In the Fiscal Year 2012/13, FISIM grew by 8.4 percent compared to a decline of 11.4 percent in 2011/12. FISIM contributed a minus 2.4 percent to total GDP at current prices in the Fiscal Year 2012/13.

4.1.3.4.8 Taxes on products

Taxes on products grew by 7.8 percent in 2012/13 compared to a growth of 4.7 percent in 2011/12. Taxes on products contributed 7.9 percent to total GDP at current prices during the Fiscal Year 2012/13.

4.1.4 Expenditure Approach Series

4.1.4.1 Final consumption expenditure

Final consumption expenditure is expenditure by **Households, Government and Non Profit Institutions Serving Households** (NPISH) on goods or services that are used for the direct satisfaction of individual needs or wants or the collective needs of members of the community. Overall final consumption expenditure declined by 1.3 percent in 2012/13 compared to a growth of 3.4 percent in 2011/12.

Households: Household final consumption expenditure declined by 1.4 percent in 2012/13 compared to a growth of 6.1 percent in 2011/12.

Government: Government final consumption expenditure declined further by 0.6 percent in 2012/13 compared to a decline of 15.4 percent registered in 2011/12. The decline in the final consumption expenditure was mainly due to constrained domestic demand.

4.1.4.2 Gross Capital Formation

Fixed capital formation: Fixed Capital Formation grew by 9.0 percent in 2012/13 compared to a growth of 3.0 percent registered in 2011/12.

Changes in inventories: Changes in inventories grew by 2.8 percent in 2012/13 compared to a decline of 8.2 percent registered in 2011/12.

The strong growth in Gross Fixed Capital Formation was mainly due to increased construction works (roads, bridges, and Non residential buildings) by government, which grew by 29.8 percent in 2012/13 compared to a decline of 23.8 percent in 2011/12.

4.1.4.3 Exports and Imports of goods and services

Exports grew by 18.6 percent in 2012/13 compared to a growth of 15.6 percent in 2011/12. The growth in exports was mainly due to the strong growth in exported goods. Imports declined by 2.5 percent in 2012/13 compared to a growth of 8.6 percent in 2011/12. Net exports declined by 23.1 percent in 2012/13 compared to a growth of 2.5 percent in 2011/12. The improved performance of net exports was because the rate of growth of exports was higher than that of imports during 2012/13 compared to 2011/12.

4.1.5 Balance of Payments (BOP)

The BOP estimates recorded a surplus of 573.6 million US dollars in 2012/13 compared to a surplus of 738.3 million US dollars in 2011/12 which is a decline of 22.3 percent (Statistical Appendix Table 4.1 N).

4.1.5.1 Current account

The current account registered a deficit of 1,620.8 million US dollars in 2012/13 compared to a deficit of 2,045.6 million US dollars 2011/12. The deficit was mainly due to the improving trade balance and service account flows (Statistical Appendix Table 4.1 N).

4.1.5.2 Trade balance

The Trade balance slightly improved from a deficit of 2,573.2 million US dollars in 2011/12 to 1,785.9 million US dollars in 2012/13. The slight improvement in trade balance in 2012/13 is due to increased exports earnings estimated at 2,964.0 million US dollars from 2667.4 million US dollars in 2011/12 (Statistical Appendix Table 4.1 N).

4.1.5.3 Service and Income

The net flow of services and income for the year 2012/13 recorded a deficit of 943.4 million US dollars compared to a decline of 920.0 million US dollars recorded in 2011/12. The service account and income account recorded deficit of 424.9 million US dollars and 526.9 million US dollars respectively during 2012/13 (Statistical Appendix Table 4.1 N).

4.1.5.4 Capital and Financial Account

The capital and financial account surplus increased by 14.0 percent in 2012/13 to 2,883.2 million US dollars in 2012/13 from 2,528.8 million US dollars in 2011/12 (see appendix Table 4.1 N).

4.2 Price Statistics

This section presents the Consumer Price Index (CPI), Producer Price Index (Manufacturing and Hotels & Restaurants) and the Construction Sector Index (CSI).

4.2.1 Consumer Price Index (CPI)

This section presents statistics on Consumer Price Indices (CPI) for goods and services consumed by households. The national CPI covers seven urban centres namely, Kampala, Jinja, Mbale, Masaka, Mbarara, Gulu and Arua. Included are Consumer Price Indices of eight baskets, one for each urban centre, except Kampala whose basket was sub-divided into two (Kampala High Income and Kampala Middle & Low Income) basing on the consumption patterns of households and their points of purchase. Also included are the Composite CPI, which is the combined index for the eight baskets, and the average market prices for selected goods for Kampala Low & Middle income baskets.

The price indices are computed at two stages. The first stage involves the computation of elementary indices using the elementary aggregate level prices using the geometric mean approach. These prices are then used to compute the elementary aggregate level indices. The second stage is the computation of higher level indices which are arrived at as a weighted average of the elementary aggregate indices.

4.2.1.1 Headline Inflation

Headline Inflation is the measure of the relative changes in prices of all goods and services in the consumption basket. The 2012 Calendar Year registered a relatively lower average inflation rate of 14.0 percent compared to the 18.7 percent inflation rate recorded for 2011 Calendar year as shown in Figure 4.2.1. The high inflation rate (14.0 percent) recorded in 2012 was due to persistent increases in prices of food, beverages, clothing and charges for transport and communication. This was mainly attributed to the high exchange rate and rising fuel prices experienced during the year. Figure 4.2.2 portrays average annual Headline Inflation rate for the Calendar years 2011 and 2012 registered for the eight baskets (centres). Kampala High Income recorded the highest inflation rate of 16.2 percent, while Jinja registered the lowest average inflation rate of 11.4 percent in the year 2012. The Financial Year 2011/12 registered a double digit inflation rate of 23.5 percent compared to 6.5 percent inflation rate recorded in 2010/11 Financial Year. Detailed centre inflation tables are presented in the Statistical Appendix Tables 4.2 A – 4.2M.

Figure 4.2.1: Headline Index and Annual Inflation Rates, 2007–2012

Figure 4.2.2: Headline Inflation Rates by Basket (Centre) 2011 and 2012

Note KHI (Kampala High Income); KMI (Kampala Middle Income)

4.2.1.2 Core Inflation

Core Inflation measures relative changes in the prices of all goods and services in the consumption basket excluding fresh fruits, fresh vegetables, dried vegetables and fresh milk. Also excluded are tobacco leaves, electricity, petrol, diesel, paraffin, propane gas and metered water. The average Core Annual Inflation Rate fell to 14.7 percent in 2012 from 17.3 percent recorded in 2011 as shown in Figure 4.2.3 below. The decrease in the inflation rate was attributed to decreases in prices of commodities such as sugar, charcoal, clothing, household & personal goods during 2012 compared to the prices of 2011 calendar year. The core inflation rate for Financial Year 2011/12 increased to 24.6 percent from 6.3 percent recorded in 2010/11 Financial Year (Statistical Appendix Table 4.2 B).

Figure 4.2.3: Food Crops, Core and EFU Average Annual Inflation 2008 – 2012

4.2.1.3 Food Crops Inflation

As shown in Figure 4.2.3 above, the annual Food Crops inflation rate for 2012 decreased to 9.7 percent from 29.1 percent recorded for the 2011. The decrease in average food crop inflation rate is attributed to increased supplies of food items during Calendar Year 2012. The Financial Year 2011/12 registered a higher average food crops inflation of 20.8 percent compared to the 8.0 percent recorded for Calendar Year 2010/11. (Statistical Appendix Table 4.2 B).

4.2.1.4 Energy, Fuel and Utilities (EFU) Inflation

In 2012, the local market registered a rise in prices of fuel. As a result, the average EFU Inflation rate increased further to 15.5 percent from the 10.3 percent recorded for 2011 calendar year. (Statistical Appendix Table 4.2 B).

4.2.1.5 Major Inflation drivers during the 2012 calendar year

Over the 12 months of 2012, the Composite Index declined to 14.0 percent. Price index increases for the high level aggregates during the same period are: Food (8.5 percent), Beverages & Tobacco (16.4 percent), Clothing & footwear (16.2 percent), Rent, Fuel & Utilities (20.8 percent), Household & Personal Goods (15.8 percent), Transport & communication (13.7 percent), Education (15.6 percent), Health, Entertainment & other Services (15.8 percent). The increase in the indices is attributed to rising prices caused by low supplies, seasonal factors and increasing local and foreign demand for the food. In addition, a rise in prices of fuel experienced during the 2012 calendar year also contributed to the increase.

4.2.2 Producer Price Index - Manufacturing

The coverage of the Producer Price Index–Manufacturing (PPI-M) has been restricted to businesses in the manufacturing sector and the structure of the PPI-M is such that goods produced for the Local Market represent 79.0 percent as opposed to 21.0 percent for goods produced for the export market. The index is presented in eight broad manufacturing industry groups as listed in Table 4.2.1:

4.2.2.1 PPI-M (Combined) Average Annual Change

The PPI-M (Combined) recorded an increase of 5.3 percent in the calendar year 2012 mainly due to rise in prices of Food Processing by 3.2 percent, Drinks and Tobacco by 3.7 percent, Chemical, Paint, Soap and Foam Products by 4.0 percent, Metal Products by 4.9 percent.

with the exception of Conference facilities where prices dropped experienced price increments in 2012 compared to 2011 prices.

Table 4.2.3: Percentage Changes in Producer Price Indices- Hotels & Restaurants (Jan-Mar=100), 2008-2011

Industry Group	2009	2010	2011	2012
Hotels and Restaurants	13.64	3.53	15.74	6.2
Accommodation	15.69	-3.43	14.98	4.37
Hotel accommodation (rooms, suites etc)	15.75	-4.13	14.44	6.07
Other hotel services (e.g conference halls)	15.71	-1.35	15.95	-1.66
Catering services	11.13	12.18	16.46	9.44
Food and snacks	9.77	15.51	18.94	8.51
Buffet	9.83	17.85	13.72	11.76
A' la carte (specific foods)	11.26	13.47	19.63	6.36
Snacks (light bites, coffee, tea)	9.84	12.61	36.16	21.98

4.2.4 Construction Sector Indices

The Construction Sector Index (CSI) is an input price index which measures the cost of a given set (basket) of construction goods and services, relative to their cost in the base period. The basket includes the costs of materials, equipment and labour as inputs to the construction sector. The first quarter (January-March) of 2006 is the base period for the CSI.

4.2.4.1 CSI Composition

CSI is composed of Basic Heading and Composite Indices. Basic Headings are the smallest sets of goods and services which are used to build up Composite Indices. Each Basic Heading covers a reasonably homogeneous set of goods and services, which are maintained over time. For example, items within a Basic Heading are likely to be made from the same material. A list of Basic Headings is given in Statistical Appendix Table 4.2 T.

4.2.4.2 Annual Changes

As shown in table 4.2.5 below, the highest increase in average prices of inputs in the overall construction sector was registered in 2011 at 25.8 percent, followed by an increase of 15.2 percent in 2008. The lowest increase in average prices for the whole sector was registered in 2012 at 7.3 percent.

Similarly, the category of Civil works experienced the highest increase in average prices of inputs in 2011 at 25.5 percent, followed by 19.5 percent in 2008 and the lowest increase of 6.2 percent in 2012. Furthermore, the average price of inputs into All Buildings registered the highest increase at 25.8 percent in 2011, followed by 14.2 percent in 2008 and the lowest increase was 5.9 percent in 2010.

The inputs within their respective categories followed the same trend of average price increase over the period with slight variations for Inputs into Water Projects and Roads gravel under Civil Works. Inputs into Water Projects experienced the highest price increase of 21.4 percent in 2011, followed by 14.1 percent in 2008 and the lowest increase was 8.9 per cent in 2010, while Inputs into Roads gravel experienced the highest price increase of 30.4 percent in 2011, followed by 22.1 percent in 2010 and the lowest increase was 5.1 per cent in 2012.

Table 4.2.5 Construction Sector Indices, Jan-Mar 2006=100, Percentage Changes

	Weight	2008	2009	2010	2011	2012
All Buildings	80	14.2	11.0	5.9	25.8	7.6
Residential Buildings	30	14.2	11.9	4.1	23.9	7.3
Formal	15	14.5	10.4	6.0	25.7	7.9
Own-account	15	14.1	13.4	2.2	22.0	6.6
Non-Residential Buildings	50	14.0	10.7	6.8	27.0	7.8
Civil works	20	19.5	13.0	17.2	25.5	6.2
Roads paved	10	21.2	15.9	19.0	25.0	5.1
Roads gravel	5	21.9	8.0	22.1	30.4	5.1
Water projects	5	14.1	12.2	8.9	21.4	10.1
Whole sector	100	15.2	11.4	8.1	25.8	7.3

4.3 External Trade

This section presents a summary of external trade statistics in value and quantity based on actual flow of goods as recorded by Customs Department of the Uganda Revenue Authority (URA) and augmented by Non-Customs data sources. In particular, the Informal Cross Border Trade (ICBT) survey statistical information has been included for completeness purposes. The section further looks at the direction of trade of goods with respect to Uganda and the rest of the world. Here Uganda's trading partners have been classified according to continent, regional blocs and selected individual countries. The compilation of external trade statistics was based on the General Trade System and Standard International Trade Classification Revision Four (SITC Rev4).

4.3.1 Trade Balance

Uganda continued to experience trade deficit throughout the period (2008 – 2012) as shown in table 4.3.1 with the highest trade deficit of US \$ 3.3 billion being registered in 2012.

4.3.2 Exports

During 2012, total export earnings were US \$ 2.8 billion, of which, formal exports were worth US \$ 2.4 billion, while informal exports were worth US \$ 453.7 million. The overall export earnings rose by 11.8 percent in 2012 after an increase of 17.1 percent in 2011. In 2012, formal and informal exports earnings increased by 9.2 percent and 27.5 percent respectively. There was a general increase in Uganda's informal merchandise exports to all her neighbours. This was after a drastic reduction from 798.5 million in 2009 to 528.3 million in 2010 and further to 355.8 million in 2011 (Statistical Appendix Table 4.3 N). The increase in exports earnings is partly attributed to the general recovery of the world economy which improved demand for merchandise exports.

4.3.3 Imports

The total imports bill in 2012 was US \$ 6.1 billion, of which, formal imports accounted for US \$ 6.4 billion, while informal imports were estimated at US \$ 53.0 million. The total imports expenditure rose by 7.2 percent in 2012 after an increase of 20.2 percent in 2011. While the formal imports bill increased for the last three consecutive years since 2010, informal imports have kept declining during the same period.

Table 4.3.1: Summary of external trade statistics: 2008 – 2012 (million US \$)

Trade Flow	2008	2009	2010	2011	2012
Informal Exports	807.7	798.5	528.3	355.8	453.7
Formal/Official Exports	1,724.3	1,567.6	1,618.6	2,159.1	2,357.5
Total Exports	2,532.0	2,366.1	2,146.9	2,514.9	2,811.2
Informal Imports	78.1	82.0	66.5	53.9	53.0
Formal/Official Imports	4,525.9	4,257.6	4,664.3	5,630.9	6,042.8
Total Imports	4,604.0	4,339.6	4,730.8	5,684.8	6,095.8
Trade Balance	-2,072.0	-1,973.5	-2,583.9	-3,169.9	-3,284.6
% change (Exports)	35.6	-6.6	-9.3	17.1	11.8
% change (Imports)	29.6	-5.7	9.0	20.2	7.2

Notes:

1. 2012 figures are provisional

2. Balance of Payments (BOP) figures are slightly different due to inclusion of estimates of other trade transactions.

Source: Uganda Bureau of Statistics, URA, UCDA, UETCL, TOTAL U LTD, SHELL U LTD and UTA

Figure 4.3.1 below shows the trend of imports, exports and trade balances from 2008 to 2012. From the figure, imports and exports increased in 2011 and 2012, although the trade deficit kept on worsening. Although the rate of increase of imports was less than that of exports, its value increase was greater than that of the exports. Moreover, the imports bill more than doubled the export receipts during the last three years.

Figure 4.3.1 Imports, Exports and Trade Balance, million US \$, 2008 – 2012

4.3.4 Main traded Commodities

4.3.4.1 Commodity Exports

The contribution of Traditional Exports (TEs) to overall formal export earnings decreased from 31.4 percent in 2011 to 25.1 percent in 2012. The notable decrease in share is attributed to a significant decline in coffee earnings. (Statistical Appendix Table 4.3 C)

Coffee remained the main foreign exchange earner throughout the period under review although its share to total formal export earnings dropped considerably from 21.6 percent in 2011 to 15.8 percent in 2012. The value of coffee earnings decreased significantly from US \$ 466.7 million in 2011 to US \$ 372.2 million in 2012 due to a reduction in international market prices. Similarly, the quantity of Coffee exported also decreased from 188,623 tonnes in 2011 to 161,656 tonnes in 2012. (Statistical Appendix Tables 4.3 A – 4.3 C).

Tea earnings increased over the last five years although its share to total formal export revenue continued to fall from 4.2 percent in 2010 to 3.3 percent in 2011 and then to 3.1 percent in 2012. However, in 2012, Tea earnings increased to US \$ 73.9 million from US \$ 72.1 million in 2011.

The Cotton share to the formal export earnings fell slightly from 4.0 percent in 2011 to 3.2 percent in 2012. Meanwhile, the volumes of cotton exported increased during 2012 to 43,258 tonnes from 25,587 tonnes in 2011. The reduction in cotton earnings could be attributed to a fall in the prices in the global market.

The contribution of Non-Traditional Exports (NTEs) to total formal export earnings improved from 68.6 percent in 2011 to 74.9 percent in 2012. The major commodities in the NTEs category that attracted considerable earnings in 2012 were cellular telephones with a share of 6.1 percent, petroleum products (5.8 percent), fish and fish products (5.4 percent), sugar and sugar confectionary (5.2 percent), Animal/vegetable fats & oils (4.7percent) and cement (4.5 percent). It is important to note that some of the merchandise under the NTEs category are re-exports.

Prior to 2012, fish and fish products were the leading foreign exchange earner under the NTEs. However, in 2012, it ranked third on account of reduced international market prices.

4.3.4.2 Commodity Imports

Petroleum and petroleum products registered the highest import bill of US\$ 1.3 billion accounting for 22.2 percent of the expenditure on formal imports. This was followed by Road Vehicles with US \$ 517.8 million (8.6 percent), Machinery specialized for particular industries with US\$ 357.9 million (5.9 percent), and, Cereals and cereal preparations valued at US \$ 306.7 million (4.8 percent). (Statistical Appendix tables 4.3E and 4.3F)

4.3.5 Direction of Trade

4.3.5.1 Exports

The Common Market for Eastern and Southern Africa (COMESA) regional bloc remained the main destination for Uganda's exports throughout the period under review. Export earnings from COMESA region increased from US\$ 1.3 billion in 2011 to US\$ 1.6 billion in 2012. Its market share also increased significantly from 52.6 percent in 2011 to 57.7 percent in 2012. (Statistical Appendix Table 4.3 H).

The EU market share ranked second dropping from 18.9 percent in 2011 to 14.7 percent in 2012. This was followed by the Middle East, whose market share rose from 6.4 percent in 2011 to 6.8 percent in 2012, and then the Asian continent, which registered a decrease in its market share from 7.3 percent in 2011 to 5.6 percent in 2012.

Sudan remained the main destination for Uganda's exports within the COMESA region, whose share was 14.5 percent in 2012 down from 16.4 percent in 2011 due to Independence of South Sudan. D.R. Congo, Kenya and Rwanda registered slight increases in their market shares in 2012. Other African countries outside the COMESA region also registered a combined increase in the market share from 3.9 percent in 2011 to 4.7 percent in 2012.

The value of exports to EU region decreased from US \$ 475.9 million in 2011 to US \$412.2 million in 2012. This decrease is partly attributed to decline in the volumes and values of coffee exports, which is mainly destined for the EU market. The main trading partners within the EU bloc were Netherlands, Germany, UK, and Belgium.

4.3.5.2 Imports

The Asian continent remained the leading source of Uganda's imports throughout the period under review. Its market share has kept growing over the years up to 48.9 percent in 2012, compared to the previous market shares of 45.4 percent and 37.2 percent recorded in 2010 and 2011 respectively. The main trading partners within the Asian continent were India, China and Japan whose market shares stood at 20.8 percent, 11.2 percent and 5.3 percent in 2012 respectively. (Statistical Appendix Table 4.3 L)

The African continent ranked second with an import bill of US \$ 1.2 billion in 2012, accounting for 19.1 percent of the total imports bill from 20.2 percent during 2011. The previous import bills for the continent were US\$ 992.9 million and 1.2 billion registered in 2010 and 2011 respectively. The COMESA regional bloc accounted for 12.5 percent of the total imports expenditure, with Kenya taking the highest share of 10.1 percent in 2012. Among the SADC countries, The Republic of South Africa contributed significantly to the imports bill by accounting for 4.9 percent in 2012. (Statistical Appendix Table 4.3 L).

The imports bill from the Middle East countries steadily increased throughout the period under review. It increased from US\$ 840.7 million in 2011 to US\$ 922.0 million in 2012, with its share to total imports increasing slightly to 15.1 percent in 2012 from 14.8 percent in 2011. The main trading partner states within the Middle East were United Arab Emirates, Saudi Arabia, and Bahrain whose market shares were 7.4 percent, 4.9 percent, and 1.2 percent in 2012 respectively.

The imports expenditure for the EU regional bloc continued to decline from US \$727.5 million in 2010 to US \$713.4 million in 2011 and then US\$ 653.3 million in 2012. (Statistical Appendix Table 4.3 D).

Overall, the trade deficit has continued to widen as the imports bill has more than doubled the export receipts for the period under review.

4.4 Government Finance Statistics (GFS)

4.4.1 Introduction

This section provides information on the fiscal operations of the General Government. Fiscal operations include the revenue and expenditure of government institutional units. Government revenue is further analyzed by type of revenue while Government expenditure is analysed by economic and functional classification following the Government Finance Statistics 2001 Manual. The fiscal statistical information is critical in guiding policy and decision makers to analyze the impact of the fiscal operations at the level of government, institutional sector and other sectors of the economy.

4.4.2 Coverage

Government Finance Statistics (GFS) coverage is currently restricted to the General Government sector. This sector is comprised of Central Government and Local Government including non-profit institutions that are controlled and financed by the government. GFS compilation currently excludes public corporations.

4.4.3 Government Revenue

In the Fiscal Year 2011/12 the government revenue rose to Shs. 7,763.4 billion from Shs. 7,292.3 billion in FY 2010/11. Tax revenue remained the principal revenue source accounting for a 84.8 percentage points of total revenue in FY 2011/12, while the non tax revenue accounted for only 15.2 percent. Throughout the period under review, taxes on goods and services (VAT and Excise taxes) remained the main source of government tax revenue with their share to total revenue being at 43.3 percent. Grants, the largest component of non tax revenue, contributed 13.9 percent of total revenue in FY 2011/12 having risen by 26.8 percent from the FY 2010/11. (Figure 4.4.3 and Statistical Appendix Tables 4.4 B (a) & 4.4 B (b))

Figure 4.4.3: Performance of Central Government Revenue by Type for FY 2008/09 to 2012/13

4.4.4 Central Government Expenditure

Total Central government expenditure for the FY 2011/12 was 8,286.8 billion. This was a 4.0 percent increase in the central government expenditure compared to the FY 2010/11. Of the total Central government expenditure for the FY 2011/12, the recurrent expenditure had a total of 4,094.1 billion while development and Donor expenditures were 2,649.5 and 1,802.4 billion respectively. The General Public Administration, Defence and Roads took the largest share of the total central government budget accounting for 25, 14 and 17 percent respectively while water had the smallest share of only 1.2 percent of the total Central government budget. (Figure 4.4.4 and Statistical Appendix Tables 4.4 C to 4.4 G)

Figure 4.4.4: Percentage Contribution to Total Central Government Expenditure by Function for FY 2010/11 and 2011/12

In FY 2011/12, General Public Administration, Defence and Public Order and Safety Affairs sectors registered the largest share of the central government recurrent budget amounting to Shs 2,875 billion, which was 74.8 percent of the total budget. [Statistical Appendix Tables 4.4 C (a) & 4.4 C (b)]

In comparison with FY 2010/11, the total Development Expenditure for FY 2011/12 amounting to Shs 2,649.5 billion showed an annual decline of 13.7 percentage points. The largest component of the development budget went to other economic affairs which comprises of Fuel and Energy affairs and services, mining and mineral resources, transport, tourism etc. The huge amount in this sector is attributed to the investment in Fuel and Energy Affairs. [Statistical Appendix Tables 4.4 D (a) and 4.4 D (b)]

4.4.5 Local Government recurrent expenditure

During the Fiscal Year 2011/12, spending on education, General Public Administration and Health continued to register the largest share of Local Government recurrent expenditure.

In the same period, Urban Authorities which are categorized under the Local Government, recorded a 34.2 percent decline from Shs. 210 billion in FY 2010/11 to Shs. 138.1 billion in FY 2011/12. This decline was attributed to the formation of Kampala City Council Authority (KCCA) which used to be part of the Urban Authorities and now is part of the Central Government.

4.5 Banking and Currency

This section presents Banking and Monetary Statistics from 2008 to 2012.

4.5.1 Monetary Survey

Monetary survey shows that Net Foreign Assets increased by 17.6 percent to 8,754.2 billion shillings from 7,444.4 billion shillings between June 2011 and June 2012.

The Net Domestic Credit of the banking system registered a 7.1 percent reduction from 7,225.5 billion shillings in June 2011 to 6,712.8 billion shillings in June 2012. During the same period, net claims on the Central Government declined greatly by 183.9 percent from 673.1 billion shillings to minus 564.6 billion shillings, claims on the private sector increased by 11.1 percent while foreign currency loans to residents increased by 35.1 percent.

Between the period June 2011 and June 2012, money supply (M3) increased by 7.4 percent from 10,437.8 billion shillings in June 2011 to 11,210.7 billion shillings in June 2012, money supply (M2) declined by 4.3 percent from 7,945.8 billion shillings in June 2011 to 7,603.0 billion shillings in June 2012. As part of money supply (M1), currency in circulation increased by 2.8 percent from 1,899.6 billion shillings to 1,952.4 billion shillings in June 2011 and June 2012 respectively (Statistical Appendix Table 4.5 A)

4.5.2 Structure of Interest Rates

The average lending rate to Commercial Banks by the Central Bank increased to 25.0 percent in June 2012 from 16.7 percent in June 2011.

The 91 days Treasury Bills rate increased to 16.7 percent in June 2012 from 12.1 percent in June 2011. Similarly the 182 days Treasury Bills rate increased to 17.1 percent in June 2012 from 12.4 percent in June 2011. In the same way, 364 days Treasury Bills rate increased to 16.1 percent in June 2012 from 12.6 percent during the same period.

The Commercial Banks deposit rate went up from 2.6 percent in June 2011 to 3.4 percent in June 2012. Demand deposit rate increased from 1.1 percent in June 2011 to 1.3 percent in June 2012. Savings deposit rate increased from 2.3 percent in June 2011 to 3.3 percent in June 2012 while Time deposit rate (7-12 months) increased from 11.0 percent to 17.7 percent in the same period (Statistical Appendix Table 4.5 B).

4.5.3 Exchange Rates

The average buying rate for foreign exchange appreciated from 2,509.0 shillings in 2011 to 2,493.9 shillings in 2012. The average selling rate appreciated from 2,522.7 shillings in 2011 to 2,504.3 shillings in 2012. In the same way, the Bureau mid-rate appreciated from an average of 2,515.9 shillings in 2011 to an average of 2,499.1 shillings in 2012.

Furthermore, the Interbank mid-rate appreciated by 0.7 percent from an average of 2,522.7 shillings in 2011 to an average of 2,504.6 shillings in 2012 (Statistical Appendix Table 4.5 E).

4.5.4 Commercial Banks' Assets and Liabilities

Total assets of Commercial Banks increased by 41.9 percent from 10,155.1 billion shillings in June 2011 to 14,411.6 billion shillings in June 2012. Total borrowing of commercial banks almost doubled from 499.6 billion shillings to 909.06 billion shillings indicating an 82 percent increase.

Loans due from Commercial Banks and other Credit Institutions decreased by 26.2 percent from 938.3 billion shillings to 692.27 billion shillings. Central Government Securities went up by 3.2 percent from 2,498.2 billion shillings to 2,579.3 billion shillings during the same period.

Similarly Commercial Banks assets in notes and coins decreased by 19.3 percent from 476.7 billion shillings to 384.89 billion shillings. In addition to that, Commercial Banks deposits increased from 9,118.7 billion shillings in June 2011 to 9,732.52 billion shillings in June 2012 indicating a 6.7 percent increment in deposits by commercial banks. (Statistical Appendix Table 4.5 C & 4.5 D)

4.5.5 Commercial Banks Outstanding Loans and Advances

Commercial Banks local currency outstanding loans and advances to the private sector increased by 0.9 percent from 4,632.8 billion shillings in June 2011 to 4,676.8 billion shillings in June 2012 (figures revised from June 2007 up to June 2012). The main contributor to the overall growth was building and construction loans which increased from 996.6 billion shillings in June 2011 to 1,067.2 billion shillings in June 2012 giving a contribution of 22.8 percent in total outstanding loans as at June 2012. Another main contributor to the overall growth was personal and household loans which increased from 999.6 billion shillings in June 2011 to 1,052.7 billion shillings in June 2012 giving a contribution of 22.5 percent in total outstanding loans as at June 2012 (Statistical Appendix Table 4.5 F).

In the same way, Commercial Banks foreign currency outstanding loans and advances to the private sector in June 2012 increased by 34.9 percent from 1,883.4 billion shillings to 2,540.2 billion shillings in June 2012. Building and Construction loans were the biggest contributors to the overall total in June 2012 with a 24.2 percent contribution to total outstanding foreign currency loans in June 2012 (Statistical Appendix Table 4.5 G).

4.6 Insurance

Statistics on insurance services include the number of life and non-life policies issued, premium supplements as well as paid and outstanding claims. Also included are the Non-life business and the consolidated balance sheet of insurance companies.

4.6.1 Policies issued

Individual, Group, and Deposit Administrative Plan (DAP) are the life insurance policies issued while the non-life insurance policies include fire, marine/aviation, motor, and miscellaneous accidents. The number of life policies issued in 2011 went up by 44.7 percent from 1,235 in 2010 compared to 1,788 policies issued in 2011. The non-life insurance policies issued also went up by 43 percent to 246,444 in 2011 compared to 172,151 non-life policies issued in 2010.

Table 4.6.1: Number of Insurance policies issued, 2007- 2011

Policy	2007	2008	2009	2010	2011
Non-Life	216,664	185,516	109,817	172,151	246,444
Life	1,210	1,350	2,092	1,235	1,788
Total	217,874	186,866	111,909	173,386	248,232

Source: Insurance Regulatory Authority of Uganda.

4.6.2 Insurance companies' income and expenditure

Life insurance gross premium incomings increased by 46.3 from 23,638 million shillings in 2010 to 34,586 million shillings in 2011. (See Appendix Table 4.6 C)

Life insurance for the reinsurance outgoings increased from 3,040 million shillings in 2010 to 4,214 million shillings in 2011, an increase of 38.6 percent. Increases were as a result of increases in both the life group and life individual. (Statistical Appendix Table 4.6 D)

An increase of 23.2 percent in non-life insurance gross premium incomings was registered in 2011 compared to 2010. The non-life Insurance premium incomings increased from 152,639 million shillings in 2010 to 188,071 million shillings in 2011.

The fire category in the non-life insurance premium incomings recorded a 13.4 percent increase from 37,966 million shillings in 2010 to 43,086 million shillings in 2011 and miscellaneous accidents recorded a 29.3 percent increase from 33,057 million shillings in 2010 to 42,768 million shillings during the year 2011, while marine and motor insurance also went up by 24.3 from 16,921 million shillings to 21,034 million shillings and 25.5 percent from 64,695 million shillings to 81,183 million shillings respectively. The increases in the non-life insurance gross premium incomes were mainly registered in all income categories (Statistical Appendix Table 4.6 F).

The fire category in the non-life reinsurance outgoings recorded a 20.7 percent increase from 26,960 million shillings in 2010 to 32,547 million shillings in 2011 and miscellaneous accidents recorded a 32.6 percent increase from 19,964 million shillings in 2010 to 26,476 million shillings during the year 2011, while marine and motor insurance also increased by 18.4 percent from 11,697 million shillings to 13,844 million shillings and 35.8 percent from 4,809 million shillings to 6,532 million shillings respectively. The outgoings in form of reinsurance increased by 25.1 percent in 2011 as compared to 2010 (see Statistical Appendix table 4.6 G). The proportion of life insurance gross premium paid out in reinsurance increased by 46.3 percent in 2011 compared to 15.6 percent in 2010 and net premium income also rose to 38.6 percent during 2011 compared to 49.6 percent in 2010 (Statistical Appendix Tables 4.5 C and 4.6 H)

4.6.3 Insurance Companies' Paid and Outstanding Claims by Class

The insurance companies' paid and outstanding claims category went up 8.5 by percent in 2011 compared to a 41.3 percent increase in 2010. Non-life paid and outstanding claims increased from 38,033 million shillings in 2010 to 41,274 million shillings in 2010. Marine aviation insurance class business declined from 3,932 million shillings to 2,978 million shillings which was a decrease of 24.3 percent in 2011 compared to an increase of 160 percent in 2010. Fire insurance was the highest paid in 2011 increasing from 2,693 million shillings in 2010 to 3,643 million shillings in 2011 that is 35.3 percent in 2011 compared with 77.3 percent in 2010. (Statistical Appendix Table 4.6 I)

The life paid and outstanding claims category registered an increase of 31.3 percent in 2011 compared to an increase of 145.0 percent during the year 2010.

The life paid and outstanding claims category increased from 12,902 million shillings in 2012 to 16,948 million shillings in 2011. Life individual paid and outstanding claims category registered a 14.2 percent increase compared to a 67.1 percent increase in 2010. While for Life group there was an increase from 24.7 percent in 2010 to 88.8 percent in 2011. (Statistical Appendix table 4.6.J)
